

27 DEC 2023

KENYATTA UNIVERSITY
EXAMINATION FOR THE DEGREE OF BACHELOR OF EDUCATION, BACHELOR
OF ARTS AND BACHELOR OF SCIENCE
AGE 200 . QUALITATIVE AND QUANTITATIVE TECHNIQUES IN GEOGRAPHY

1ST SEMESTER 2023/2024

TIME: 2 HOURS

BY RAVINE OCHTENG; 0742600411

INSTRUCTIONS: Answer Question 1 (ONE) and any other TWO Questions.
 Illustrations should be used where appropriate.

1(a) Briefly explain the following concepts: (10 marks)

- (i) Poisson Distribution
- (ii) Stratified sampling
- (iii) Standard error of the mean
- (iv) Parametric tests
- (v) Chi-square test

(b) (i) State any four code patterns in qualitative data analysis (4 marks)

(ii) Write short notes on the following (6 marks)

Advantages of interview method
 Grounded theory
 Memoing

(c) Briefly explain how computers can be useful in qualitative data analysis (10 marks)

2. (a) Given the data below, compute the arithmetic mean and standard deviation (16 marks)

<u>Weight (Kg)</u>	<u>Frequency</u>
6.5 - 7.5	5
7.5 - 8.5	12
8.5 - 9.5	25
9.5 - 10.5	48
10.5 - 11.5	32
11.5 - 12.5	6
12.5 - 13.5	1

(b) Explain why the mean is the most popular measure of central tendency (4 marks).

3. (a) A sample survey of 100 flowers of particular type showed that the estimated mean flower height was $15 \text{ cm} \pm 2$ at the 95 percent level of confidence. The researcher decides that he needs an estimate which is within $\frac{1}{2}$ cm of the true population mean at this level of confidence. What must his sample size be? (12 marks).

(b) Using Geographical examples, explain how you can estimate the sample size for measured data (8 marks).

4. Using examples differentiate between qualitative and quantitative research procedures (20 marks).

SIR OTONDE MICHAEL -DELEGATE

5. Explain how you will use Focus Group Discussion Method to collect unbiased qualitative data in Geography (20 marks).

BY RAVINE OCHIENG; DELEGATE.

EDUCATION, BACHELOR OF ARTS AND BACHELOR OF SCIENCE

AGE 200: QUALITATIVE AND QUANTITATIVE METHODS

BY RAVINE OCHTENG; 0742600411

DATE: Monday, 18th December 2017

TIME: 2.00p.m-4.00p.m

INSTRUCTIONS:

Answer Question ONE and any other TWO questions.

Question One (30 marks)

- (a) Explain the role of statistics in geography study (10marks)
- (b) Distinguish the following terms
- (i) Descriptive and inferential Statistics (2marks)
 - (ii) Population and Sample (2marks)
 - (iii) Dependent and independent variables (2marks)
 - (iv) Mode and Median (2marks)
 - (v) A Parameter and a Statistic (2marks)
- (c) Explain how statistical investigations is done (10 marks)

Question 2 BY RAVINE OCHTENG

With the aid of examples, distinguish qualitative and quantitative statistics (20marks)

Question 3

- (a) Given the data below determine the arithmetic mean. (16marks)

Weight (kg)	Frequency
16.5-17.5	1
17.5-18.5	6
18.5-19.5	32
19.5-20.5	48
20.5-21.5	25
21.5-22.5	6
22.5-23.5	2

RAVINE OCHTENG; DELEGATE

SIR OTONDE MICHAEL -DELEGATE

- (b) Explain why the mean is the most popular measure of central tendency. (4marks)

Question 4.

Given the data below:

27	75	36	50	73	74	74
52	48	60	44	62	75	36
15	16	71	15	64	53	70
34	72	15	92	33	55	81
54	20	34	32	45	27	77

- (a) Prepare a group frequency distribution for the data. (8marks)
(b) Construct a cumulative frequency distribution. (6marks)
(c) Comment on the distribution of the data (6marks)

Question 5

- (a) Explain what is econometric research (10marks)
(b) Given the data below

Y	100	120	140	150	165	190
X_1	1.0	1.3	1.8	2.0	2.5	3.0
X_2	2.0	2.2	2.3	2.5	2.8	3.0

- i. Determine the regression of Y on X_1 and X_2 (6marks)
ii. Interpret the equation (4marks)

UNIVERSITY EXAMINATIONS 2016/2017

FIRST SEMESTER EXAMINATION FOR THE DEGREE OF BACHELOR OF SCIENCE AND BACHELOR OF EDUCATION

AGE 200: QUALITATIVE AND QUANTITATIVE TECHNIQUES IN GEOGRAPHY

BY RAVIVE -O- OCHENG, DELEGATE
0742600411

DATE: Monday 28th November 2016

TIME: 4.30p.m-6.30p.m

INSTRUCTIONS:

Answer question 1 and any other TWO questions. Use illustrations where appropriate

1. a) Distinguish between elementary and mutually exclusive events. (8 marks)
- b) Explain the role of statistics in Geography (8 marks)
- c) Distinguish any three levels of measurement (6 marks)
- d) Using examples, distinguish between the following
 - i) Independent and dependent variables. (4 marks)
 - ii) Continuous and discrete data. (4 marks)

2. Ten students were interviewed on the number of siblings in their homes and the data is tabulated. BY RAVIVE OCHENG

S. No	1	2	3	4	5	6	7	8	9	10
Siblings	3	5	6	3	1	4	3	3	4	5

- a) Calculate the mean, mode and standard deviation (12 marks)
- b) Explain why the arithmetic mean is the most feasible measure of central tendency. (8 marks)

not muchly great by large numbers and data
Give examples of the distribution and measure of central tendency
3. a) Distinguish between any two probability distributions. (6 marks)
- b) Given a container having four red and six yellow marbles, find the probability of obtaining two red and two yellow marbles if four marbles are drawn one after the other. (8 marks)

yellow 6
- c) Explain three advantages of sampling in geographical research. (6 marks)
4. a) Distinguish any two scales of measurement. (4 marks)

3.7

3

1.3454

$\frac{3.7}{10} = 0.37$

SIR OTONDE MICHAEL -DELEGATE

b) Study the data below obtained from a poultry farmer and answer questions that follow.

Layers	1	2	3	4	5	6	7
Anticipated No. of eggs	7	10	8	12	13	6	10
Actual No of eggs	9	12	10	8	15	4	8

- State the null and alternative hypotheses (4 marks)
- Explain the process of hypotheses testing (6 marks)
- Test the null hypothesis using the chi square. *at 95%* (6 marks)

By use of examples, distinguish between qualitative and quantitative research methods.

(20 marks)

Observation

Interview

Use of field notes

Statistics

Reliability

INSTITUTIONAL BASED PROGRAMME (IBP) AUGUST 2015 SESSION
EXAMINATION FOR THE DEGREE OF BACHELOR OF ART AND BACHELOR OF
EDUCATION

AGE 200: QUALITATIVE AND QUANTITATIVE TECHNIQUES IN GEOGRAPHY

DATE: WEDNESDAY 30TH DECEMBER 2015

TIME: 2.00 P.M. - 4.00 P.M.

INSTRUCTIONS: Answer question ONE and any other TWO.

Use illustration where appropriate.

BY RAVIVE OCHIENG; 0742600411; DELEGATE

QUESTION 1 (30 MARKS)

1(a) Define statistics and briefly show its usefulness for geographic studies.

(10 marks)

1(b) Distinguish between the following terms:

(i) A parameter and a statistic

(2 marks)

(ii) Type I error and Type II error

(2 marks)

(iii) Skewness and Kurtosis

(2 marks)

(iv) Population and sample

(2 marks)

(v) Descriptive and inferential statistics

(2 marks)

1(c) Discuss the stages involved in any statistical investigation.

(10 marks)

QUESTION 2

Below is a list of marks of 45 students in AGE 200 examinations.

72+	57+	63+	50+	37+	47+	47+	28+	44+
35+	54+	60+	44+	26+	57+	36+	35+	70+
57+	61+	17+	51+	46+	35+	70+	82+	22+
43+	27+	51+	29+	33+	55+	81+	7+	18+
45+	20+	43+	23+	54+	72+	77+	46+	75+

SIR OTONDE MICHAEL -DELEGATE

- (a) Select suitable classes to prepare grouped frequency distribution for this data. (8 marks)
- (b) Using the grouped frequency distributions obtained in (a) above, construct a cumulative frequency distribution. (6 marks)
- (c) Prepare a relative frequency polygon using the grouped frequency distributions obtained in (a) above. (6 marks)

QUESTION THREE

- (a) Given the data below, compute the arithmetic mean and standard deviation. (16 marks)

<u>Weight (kg)</u>	<u>Frequency</u>
6.5 - 7.5	5
7.5 - 8.5	12
8.5 - 9.5	25
9.5 - 10.5	48
10.5 - 11.5	32
11.5 - 12.5	6
12.5 - 13.5	1

- (b) Explain why the mean is the most popular measure of central tendency. (4 marks)

QUESTION FOUR

- (a) State and briefly explain steps involved in an econometric research. (10 marks)
- (b) The production department, a company wanted to find out the relationship between the quantity produced of a particular commodity Y and cost of factors of production namely, labor, and capital. This production functions of assumed to be in the following form of linear production function.

$$Y = \beta_0 + \beta_1 x_1 + \beta_2 x_2 + u$$

where Y denotes the quantity produced of a particular commodity, x_1 and x_2 denotes the quantities of factors of production; labor and capital respectively, and β_0 , β_1 , and β_2 are unknown parameters of the production function.

SIR OTONDE MICHAEL -DELEGATE

- (a) Select suitable classes to prepare grouped frequency distribution for this data. (8 marks)
- (b) Using the grouped frequency distributions obtained in (a) above, construct a cumulative frequency distribution. (6 marks)
- (c) Prepare a relative frequency polygon using the grouped frequency distributions obtained in (a) above. (6 marks)

QUESTION THREE

- (a) Given the data below, compute the arithmetic mean and standard deviation. (16 marks)

<u>Weight (kg)</u>	<u>Frequency</u>
6.5 - 7.5	5
7.5 - 8.5	12
8.5 - 9.5	25
9.5 - 10.5	48
10.5 - 11.5	32
11.5 - 12.5	6
12.5 - 13.5	1

- (b) Explain why the mean is the most popular measure of central tendency. (4 marks)

QUESTION FOUR

- (a) State and briefly explain steps involved in an econometric research. (10 marks)
- (b) The production department, a company wanted to find out the relationship between the quantity produced of a particular commodity Y and cost of factors of production namely, labor, and capital. This production functions of assumed to be in the following form of linear production function.

$$Y = \beta_0 + \beta_1 x_1 + \beta_2 x_2 + u$$

where Y denotes the quantity produced of a particular commodity, x_1 and x_2 denotes the quantities of factors of production; labor and capital respectively, and β_0 , β_1 , and β_2 are unknown parameters of the production function.
