INTRODUCTION

Welcome to this module. This is an interactive instructional module that uses both action and collaborative learning styles that provide you with diverse online learning experiences and effective learning processes. The key purpose of this module is to expose you to inclusive education which embraces the philosophy that all children can learn together in mainstream schools and realize their optimal potentials. We will explore what inclusive education is and how it should be implemented.

We shall discuss the following key areas in this module; Terms and concepts, a developmental milestone from segregation to inclusion, categories of learners with special educational needs and those living under difficult circumstances, factors influencing exclusion of learners in regular classrooms; poverty, ethnicity, gender, disability, family structure and other difficult circumstances; assessment of curriculum and teaching strategies for learners with special needs in inclusive settings; adoption, modification, adaptation and accommodations; collaborations with related service providers; all stakeholders, Environmental modifications. Challenges encountered in inclusive settings; barriers, reform instruments on human rights and emerging trends in inclusive education.

Remember the module gives you facts that need to be practically applied to empower you to implement inclusive education in regular schools. The module also gives knowledge that prepares you for collaboration, consultation and accountability in conducting functional skills which will enable you enhance educational chances to all learners in very exciting ways.

We hope that you will find the module exciting, educative, and engaging. We also hope that it will stimulate your mind so that you can think divergently regardless of your current experiences in the ongoing CBC implementation in Kenya.

INCLUSIVE EDUCATION

FLOW CHART

WEEK	TOPIC
WEEK 0:	INTRODUCTION (Curriculum goals and objectives, Goals of O&M, Thoughts about values of inclusive education to self-esteem, educational performance, social inclusion, economic inclusion and quality of life)
WEEK 1:	Definition of terms related to inclusive education,
WEEK 2:	Developmental milestones from segregation to inclusion
WEEK 3:	Children with special needs; causes, categories and characteristics
WEEK 4:	Children living in especially difficult circumstances; causes, categories and characteristics
WEEK 5:	Factors which influence exclusion of learners in regular classrooms; school factors, teacher factors and learner factors
WEEK 6:	Socio-cultural factors which influence exclusion of children from accessing education; poverty, gender, ethnicity, family structure
WEEK 7:	Assessment of curriculum and teaching strategies for learners with special needs in inclusive settings;
WEEK 8:	Adoption, modification, adaptation and accommodations
WEEK 9:	Collaborations with related service providers; all stakeholders, Environmental modifications.
WEEK 10:	Challenges encountered in inclusive settings; barriers, reform instruments on human rights and emerging trends in inclusive education
WEEK 11&12	EXAMINATION

OVERVIEW OF THE COURSE

Week 0: Introduction

This lesson is intended to help you acclimatize to blended learning and to create a community of learners who will motivate each other during the course. You will be required to introduce yourself to your lecturer and colleagues either physically during a face to face session or even online before other academic interactions start. This will be at the discretion of individual universities and lecturers. It will be important to also state your context and goals as well as what you think about inclusive education. You can also share any experience that you may have regarding this subject.

.

Week 1: Definitions and Concepts in relation to inclusive education

In this first lesson, we will lay the foundation for the entire course by defining the key terms that will repeatedly be used in this module. The purpose of this lesson is to enable you understand the basic principles of inclusive education.

Week 2: Developmental milestones from segregation to inclusion

In this lesson, we shall explore the development of education provision from early practices of segregation, then to integration up to the current trend of inclusive education practices at family, school and community level. We will discuss issues such as benefits of inclusive education and who should be included in education and why they have been excluded.

Week 3: Children with special needs in education

In this lesson we will actively review all available information in books, journals and theses about children with special needs, causes of the special needs, categories and their characteristics. This will enlighten the students' mind on what is already known about the subject. We will look at how these children access education globally and in Kenya.

Week 4: Children living in especially difficult circumstances

In this lesson we will define the concept of difficult circumstances in relation to children and how they affect children's growth and development. Education is important in preparing children for future life and when not accessed perpetuate a cycle of poverty and underdevelopment.

Week 5: Factors which influence exclusion of learners in regular classrooms;

In this lesson we will explore the concept of educational exclusion as intrinsically related to the perspective of educational injustice. It will entail not being recognized as a 'proper learner' within the school; not being represented, listened to, or taken seriously; being stigmatized, neglected, or even ignored; feeling alienated or completely distant from educational practices and educational knowledge; not having, in summary, the conditions for a satisfactory school experience for learning and for personal development.

Week 6: Socio-cultural factors which influence exclusion of children from accessing education

In this lesson we will emphasize on the fact that education provision is imperative since it brings about among other things, gender equality, empowerment and poverty reduction at large, which then contribute to privileged performance and inclusion in national development.

Week 7: Assessment of curriculum and teaching strategies for learners with special needs in inclusive settings;

In this lesson, we will look at the various curricular considerations and instructional strategies which may enhance access to education for children with special needs and those in especially difficult circumstances. There is likelihood general school curriculum may not be able to meet their unique educational needs.

Week 8: Adoption, modification, adaptation and accommodations

In this lesson, we will look at various instructional techniques which may enable children who are at risk of being excluded from adequate learning in regular classrooms experience inclusion and attain optimal educational development.

Week 9: Collaborations with related service providers; all stakeholders, Environmental modifications

In this lesson students become aware that inclusive education calls for cooperation, shared responsibility and involvement of all stakeholders in a close network of activities which need close monitoring and reviewing of the various techniques and strategies discussed earlier in this module.

Week 10: Challenges encountered in inclusive settings; barriers, reform instruments on human rights and emerging trends in inclusive education

During this week students will wrap up the module by looking at challenges and barriers to inclusive education and the pertinent legislative support available through the efforts of various international instruments, local laws and policies that would improve the current trends of inclusive education.

Week 11&12: Examination

These two weeks bring together the work we have been doing to an end. This course unit will be examined and will partially contribute to the award of the degree in the programme that you are undertaking. We have placed examinations in the last two weeks because Kenyatta University go with this schedule. Hence, university examinations regulations will apply.

MODULE LEARNING OUTCOMES

By the end of this course the student should be able to:

- 3.1 Explain the key terms/concepts related to inclusive education and analyze developmental milestones from segregation to inclusion of learners with special needs.
- 3.2 Engage in professional inquiry in subject-area content, pedagogy, assessment, technology, health and well-being; and cultural responsiveness.
- 3.3 Create an inclusive learning environment that supports the social, physical, intellectual, cultural, and emotional development of learners.
- 3.4 Adapt curricula with accommodations, subject, time allocation, and strategies for teaching learners with special needs. and collaborate with stakeholders; learners, parents, colleagues, role-models, NGOs and maintain high standards of teaching/accountability.

3.5 Interpret Reform instruments (UN conventions, African Charter, The Kenya Constitution 2010, Policy and sessional papers) on human and educational rights.

COURSE DESCRIPTION

This is a second year second semester unit offered to all students in the school of education. The course is expected to introduce all prospective teachers on the diverse characteristics of learners in school settings who have different abilities and needs yet they require quality education in regular settings. Being able to meet needs of all learners in regular classroom entails to what has been termed as inclusive education. The course will involve definition of terms and concepts related to inclusive education, developmental milestone from segregation to inclusion, categories of learners with special educational needs and those living under difficult circumstances, factors influencing exclusion of learners in regular classrooms; poverty, ethnicity, gender, disability, family structure and other difficult circumstances; assessment of curriculum and teaching strategies for learners with special needs in inclusive settings; adoption, modification, adaptation and accommodations; collaborations with related service providers; all stakeholders, Environmental modifications. Challenges encountered in inclusive settings; barriers, reform instruments on human rights and emerging trends in inclusive education.

COURSE REQUIREMENTS

This is a blended learning course that will utilize the flex model. This means that learning materials and instructions will be given online and the lessons will be self-guided with the lecturer being available briefly for face to face sessions and support and also on-site (online) most of the time. Your lecturer will be meeting you face to face to introduce a lesson and put it into perspective and you will actively participate in your search for knowledge by undertaking several online activities. This means that some of the 39 instructional hours of the course will be delivered face to face while other lessons will be taught online through various learner and lecturer activities. It is important for you to note that one instructional hour is equivalent to two online hours. Three instructional hours will be needed per week. Out of these, one will be used for face to face contact with your lecturer (also referred as e-moderator in the online activities) while the other two instructional hours (translating to four online hours) will be used for online activities otherwise referred to as e-tivities in the lessons. This will add up to the 5 hours requirement per lesson earlier mentioned. There are 27 online activities each taking at least two hours and totaling to 54 online hours. You are advised to follow the topic flow-chart given so that you cover at least a lesson every week.

You will be required to participate and interact online with your peers and the e-moderator who in this case is your lecturer. Guidelines for the online activities (which we shall keep referring to as e-tivities) will be provided whenever there is an e-tivity. Please note that since the online e-tivities are part of the learning process, they may be graded at the discretion of your e-moderator. Such grading will however be communicated in the e-tivity guidelines and feedback given as soon as possible after the e-tivity. The e-tivities will include but will not be limited to online assessment quizzes, assignments and discussions. There are also assessment questions that you can attempt at the end of every lesson to test your understanding of the lesson. The answers to all the assessment questions are at the end of the module after lesson 10. All the resource that has been used in this module in form of books are available under the resources section after the answers to the questions.

ASSESSMENT

It is important to note that the module has embedded certain learner formative assessment feedback tools that will enable you gauge your own learning progress. The tools include online collaborative discussions forums that focus on team learning and personal mastery and will therefore provide you with peer feedback, lecturer assessment and self- reflection. You will also be required to do one major assignment/project that is meant to assess the application of the skills and knowledge gained during the course. The project score in combination with scores for e-tivities (where graded) will account for 40% of your final examination score with the remaining 60% coming from a face to face sit-in final written examination that will be guided by your university examination policy and procedures.

We wish you the very best of experiences in this course.

LESSON ONE

INCLUSIVE EDUCATION

1.1 Introduction

Welcome to our first lesson on inclusive education. Some research facts indicate that all over the world, children are often excluded from schools which they should attend because of disability, race, religion, gender, and poverty. This is notwithstanding the fact that every child has the right to be cared for by their parents and community to grow, learn, and develop in the early years, and, upon reaching school age, enroll in the school closest to their home and be welcomed and included by teachers and peers alike. When all children, regardless of their differences, are educated together, everyone benefits—this is the cornerstone of inclusive education. Inclusive education values diversity and the unique contributions each learner brings to the classroom. In a truly inclusive school, every child feels safe and has a sense of belonging. All learners and their parents participate in setting learning goals and take part in decisions that affect them. Likewise, school staff have the training, support, flexibility, and resources to nurture, encourage, and respond to the needs of all learners. Inclusive systems provide quality education for all children and are instrumental in changing discriminatory attitudes consequently providing the context for a child's first relationship with the world outside their families, enabling the development of social relationships and interactions.

Lesson Learning Outcomes

By the end of this lesson, the learner will be able to:

- 1.2.1. Explain the key terms/concepts related to inclusive education.
- 1.2.2 Analyze developmental milestones from segregation to inclusion of learners with special needs.
- 1.2.3 Discuss the concept of inclusive education by Save the Children International

1.2.1 Terms and concepts related to inclusive education

Several definitions and descriptions of inclusive education have been advanced with none truly agreed upon. The definitions and concepts vary according to differing perceptions of what inclusive education really is.

E-tivity 1.2.1: Terms and concepts related to inclusive education

LESSON ONE -ECU 101	
Numbering and sequencing	1.2.1
Title	Terms and concepts related to inclusive education
Purpose	To expose learners to definition of terms and explanation of concepts related to inclusive education
Brief summary of overall task(2 hours)	Watch video 1 , video 2 , video 3 and explain the terms defined in these videos. Make short notes from each video.
Spark	 Every child counts!
Individual contribution (30 min.)	1. Explain the terms inclusive education, segregation, integration, mainstreaming and inclusion 2. List four benefits of inclusive education
Interaction begins (30 min.)	Post your answers on discussion forum 1.2.1 for your colleagues to see. View their answers as well and politely give constructive feedback
E-moderator interventions (1 hour)	Help students to stick on the topic of discussion. Encourage all students to participate. Give teaching points, summarize the discussion and end activity
Schedule and time	This activity is scheduled for 1 hour
Next	Developmental milestones from segregation to inclusion of learners with special needs.

1.2.2 Developmental milestones from segregation to inclusion of learners with special needs

A significant body of opinion at the turn of the century - perhaps exemplified best in the work of the child welfare pioneer Elizabeth Burgwin - saw neither purpose nor virtue in segregation. Those who shared these views did not even seriously consider segregated schooling. Instead, in thinking about the needs of children with disabilities, they thought automatically of adaptations that could be made to ordinary schools. It is quite possible that this inclusive thought might have prospered and provided the philosophical and organizational foundation for the school system of the twentieth century (Thomas, Walker and Webb 1998). The e-tivity below will guide you on further information about this topic.

E-tivity 1.2.2: Developmental milestones of inclusive education

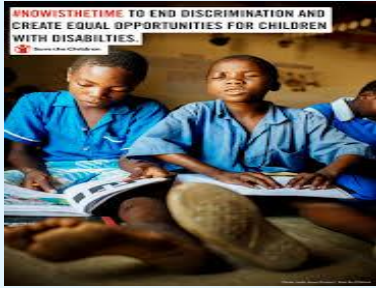

LESSON ONE -ECU 101	
Numbering and sequencing	1.2.2
Title	Developmental milestones of inclusive education.
Purpose	To expose learners to developmental milestones of education from segregation to inclusion of learners with special needs
Brief summary of overall task (2 hours)	Read the information in this Link on inclusive education by Topping and Maloney (2005) chapter 1 page 17-27. Make your own short notes.
Spark	Watch this video on inclusion movement (2020)
Individual contribution(30min).	1. Explain the roles of inclusion movement in the development of education practice.
Interaction begins (30 min.)	Post at least two roles of the movement on discussion forum 1.2.2 for your colleagues to see and view their answers and politely give constructive feedback to their answers.
E-moderator interventions(1 hour)	Help students to stick on the topic of discussion. Encourage all students to participate. Give teaching points, summarize the discussion and end activity
Schedule and time	This activity is scheduled for one hour.
Next	The concept of inclusive education by Save the Children International

1.2.3 The concept of inclusive education by Save the Children International

Save the children International Report (2020) suggests that there has been a remarkable increase in literacy rates in developing countries and many more girls have been able to access education. Progress has however, been tough in some regions due to high levels of poverty, armed conflicts and other emergencies. Sub-Saharan Africa has made the greatest progress in primary school enrolment among all developing regions – from 52 percent in 1990, up to 78 percent in 2012 with still huge disparities (Save the Children, 2020). Children from the poorest households are the most affected with up to four times more likelihood of being out of school than those of the affluent households. Disparities is also conspicuous between rural and urban populations. Inclusive quality education SDG 4 is one of the most powerful vehicles for achieving sustainable development. This goal strives toward compulsory and free primary for all boys and girls as well as free secondary schooling by 2030. It also aims at eliminating gender and wealth disparities through provision of equal access to affordable vocational training and attainment of universal access to a quality higher education (Save the Children, 2020).

E-tivity 1.2.3: The concept of inclusive education by Save the Children International

LESSON ONE -ECU 101	
Numbering and sequencing	1.2.3
Title	The concept of inclusive education by Save the Children International
Purpose	To expose learners to the concept of inclusive education by Save the Children International.
Brief summary of overall task (2 hours)	Read the content on this link Chapter one page 15 Fig. 1.10 and list down all the categories of children who should be included in educational systems. Make your own short notes.

Spark	
Individual contribution (30 min.)	1. Mention five categories of children who need inclusive education 2. Why should we see the immigrants and refugees as candidates of exclusion?
Interaction begins (30 min.)	Post your answers on discussion forum 1.2.3 and give feedback politely to your colleagues' views.
E-moderator interventions (1 hour)	Help students to stick on the topic of discussion. Encourage all students to participate. Give teaching points, summarize the discussion and end activity
Schedule and time	This activity is scheduled for one hour.
Next	We now proceed to categories of children with special needs.

1.3 Assessment Questions

1. Explain the following terms

a. Segregation

Refers to children with disabilities being provided education in separate environments which are envisaged to meet their particular needs away from their non-disabled peers.

b. Integration-

Is a process of placing students with disabilities in existing educational institutions and requiring them to adjust to the requirements of the core curriculum and fit in despite of their unique needs.

c. Mainstreaming

Is synonymous with integration and involves placing persons with disabilities in mainstream institutions and requiring that they can adjust to the standardized requirements of such institutions

d. Inclusion

- Is a process of systematic reforms and modification of content, teaching methods, approaches, structures and strategies in education to overcome barriers with a vision to provide all students with an equitable and participatory learning experience and environment that best corresponds to their requirements and preferences.

2. Mention four benefits of inclusive education

- All children are able to be part of their community and develop a sense of belonging and become better prepared for life in the community as children and adults.
- It provides better opportunities for learning. Children with varying abilities are often better motivated when they learn in classes surrounded by other children.
- The expectations of all the children are higher. Successful inclusion attempts to develop an individual's strengths and gifts.
- It allows children to work on individual goals while being with other students their own age.
- It encourages the involvement of parents in the education of their children and the activities of their local schools.
- It fosters a culture of respect and belonging. It also provides the opportunity to learn about and accept individual differences.

3. Explain persons who should be involved in the provision of inclusive education

- General education teachers- to accept all students irrespective of ability or disability, gender, race, ethnicity or social class
- Special education teachers – to give support to general education teachers in teaching methods, approaches, modifications and accommodations in curriculum content delivery
- Multidisciplinary assessment team – to assess the needs of students who may need special education considerations
- Curriculum developers – to review and develop flexible and/ or comprehensive curriculum capable of meeting the needs of all learners.
- Policy-makers – To give legislative support guidelines on the implementation of inclusive education
- Parents – To be involved and responsive to the educational needs of their children
- Community – To be involved in mobilization of community resources in the advancement of educational goals for community development.

4. Describe two categories of children who are at risk of being excluded from education provision.

a. Children with disabilities

b. Children living in especially difficult circumstances

5. Which sustainable development goal addresses inclusive education?

SDG. 4

LESSON TWO

CATEGORIES OF LEARNERS WITH SPECIAL EDUCATIONAL NEEDS

2.1 Introduction

To lay foundation for inclusive education, we introduce you to various categories of learners with special educational needs. These learners cut across every fabric of our society regardless of race, tribe, social, economic, religious or any other grouping. Therefore, any sound education offered to learners must be least discriminative in terms of meeting the needs of every learner. We therefore encourage you to engage in in-depth discussion of these categories of learners paying attention to some of their causes and characteristics. The purpose of this lesson is to enable you analyze various categories of learners with special educational needs in order to be able to include them in the learning process.

2.2 Lesson Learning Outcomes

By the end of this lesson, you will be able to:

- 2.2.1 Categorize learners with sensory impairments and learners with emotional and behaviour disorders.
- 2.2.2 Distinguish different categories of learners with intellectual differences.
- 2.2.3 Analyze learners with physical and health impairments and learners with

Multiple disabilities

2.2.1 Learners with sensory impairments and learners with emotional and behaviour disorders

Hearing loss, visual impairment, or a combination of hearing loss and visual impairment of any type or degree potentially interferes with typical methods of interacting and learning. Sensory impairment may include a learner who is blind or visually impaired, deaf or hearing impaired, or is deaf-blind. Sensory impairment does not affect the cognitive skills of a learner. However, some learners with sensory impairments also have cognitive impairments. A sensory impairment largely will affect how the learner accesses information and ultimately learns.

Learners with emotional and behavioral problems are often a mysterious, complex issue for teachers to address in school. Teachers have the opportunity to observe many different learners that come in and out of their classes each year. These learners are all unique in their abilities, interests, and weaknesses. Some learners fit in well in a mainstream setting, making progress on the core curriculum and forming healthy relationships with peers. However, once in a while, teachers will work with learners who have severe emotional and behavioral challenges. These learners may seem like loners, avoiding interaction with classmates and adults. They may get into fights with other learners, or engage in self-injurious behaviors. Their academic performance will be significantly lower than the rest of their peers. When these symptoms persist, teachers should begin looking into emotional and behavior disorders and how these learners might qualify for and benefit from special education services.

E-tivity 2.2.1- Learners with Sensory Impairments and Learners with Emotional and Behaviour disorders.

Numbering, and sequencing	2.2.1
Title	Learners with sensory impairments and learners with emotional and behaviour disorders.
Purpose	The purpose of this e-tivity is to enable you to categorize learners with sensory impairments and learners with emotional and behaviour disorders.
Brief summary of overall task	Read material 1 material 2 , material 3 , material 4 , and material 5 and then watch video 1 , video 2 , video 3 , and video 4 . As you read and watch, define learners with sensory impairments and learners with emotional and behaviour disorders.

Spark	<u>SENSORY IMPAIRMENT</u> Sensory impairment is when one of your senses; sight, hearing, smell, touch, taste and spatial awareness, is no longer normal. 
Individual task	• Watch/Read the images on sensory impairments and emotional and behaviour disorders. • Using bullet points, identify three types of learners with sensory impairments found in schools. • Using bullet points identify five types of learners with emotional and behaviour disorders. • Reflect on how your senses assist you in the learning process. • On the discussion forum, list down characteristics of different types of learners with sensory impairments and characteristics of learners with emotional and behaviour disorders.
Interaction begins	• Post your answers on the discussion forum 2.2.1. • Read what your colleagues have posted. • Critique what some of your colleagues have posted.
E-moderator interventions	• Ensure that learners are focused on the contents and context of discussion. Stimulate further learning and generation of new ideas. • Provide feedback on the learning progress. • Close the e-tivity
Schedule and time	This task should take one hour
Next	Learners with intellectual differences and learners with autism.

2.2.2 Learners with Intellectual differences

Under this group of learners, there are learners with learning disabilities, learners with intellectual disabilities, learners with autism spectrum disorder (ASD) and learners who are gifted and talented. A [learning disability](#) is a disorder that inhibits the ability to process and retain information. Because there are numerous mental processes that affect learning, learning disabilities can vary dramatically. The five most common learning disabilities in classrooms today include: dyslexia, attention deficit hyperactive disorder (ADHD), dyscalculia, dysgraphia

and processing deficits. Examples of difficulties around intellectual functioning can include problem solving, the ability to communicate effectively or the capacity to learn. Adaptive functioning and behavior may consist of specific challenges such as hygiene, routines or even day-to-day social skills. Autism spectrum disorder (ASD) on the other hand is a complex developmental condition that involves persistent challenges in social interaction, speech and nonverbal communication, and restricted/repetitive behaviors. The effects of ASD and the severity of symptoms are different in each person

Gifted and talented children” means those persons between the ages of four and twenty-one whose abilities, talents, and potential for accomplishment are so exceptional or developmentally advanced that they require special provisions to meet their educational programming needs. Gifted learners include gifted learners with disabilities thus being twice-exceptional. Gifted learners are capable of high performance, exceptional production, or exceptional learning behavior by virtue of any or a combination of various areas of giftedness.

E-tivity 2.2.2- Learners with Intellectual Differences

Numbering, and sequencing	2.2.2
Title	Learners with intellectual differences
Purpose	The purpose of this e-tivity is to enable you to distinguish different categories of learners with intellectual differences.
Brief summary of overall task	Read material 1 , material 2 , material 3 , material 4 , and material 5 and then watch video 1 , video 2 , video 3 , and video 4 . After reading the materials and watching the videos, describe each of the categories of learners with intellectual differences.
Spark	 

Individual task	Watch/Read the images above and identify the two categories of learners with intellectual differences. Using bullet points list down five causes of learning disabilities and five causes of intellectual disabilities. Identify five types of learning disabilities and list down characteristics of different types of learners with intellectual differences.
Interaction begins	Post your answers on the discussion forum 2.2.2. Read what your colleagues have posted. Compare your responses with what your colleagues have.
E-moderator interventions	• Ensure that learners are focused on the contents and context of discussion Stimulate further learning and generation of new ideas. • Provide feedback on the learning progress and close the e-tivity
Schedule and time	This task should take one hour
Next	Learners with physical and health impairments and learners with multiple disabilities.

2.2.3 Learners with Physical and other Health Impairments and Learners with Multiple Disabilities

Learners with physical disabilities and other health impairments cover a wide range of disorders. There are a variety of neuromotor impairments in this category that can be attributed to injuries to the brain or the spinal cord before, during, or after birth. One such neuromotor impairment is Cerebral Palsy, which impairs movement, speech, behavior, and many other factors. This causes a variety of implications for their education. Another disability is seizure disorder or epilepsy, where an abnormal electrical discharge pulses through nerves in the brain, causing involuntary movements or other concerns. Spinal cord injuries can also cause physical disabilities, such as Spina bifida. There are many orthopedic and musculoskeletal disorders, such as muscular dystrophy and scoliosis that can impact movement. Other health impairments cover such a large range of disorders, ranging from asthma, acquired immune deficiency syndrome (AIDS), and fetal alcohol syndrome. All of these can greatly impact a student's social, physical, and educational development. Preventing many of these physical disabilities can start with preventing child abuse, which can cause many of these diseases.

Multiple Disabilities is the simultaneous occurrence of two or more disabling conditions that affect learning or other important life functions. These disabilities could be a combination of both motor and sensory nature. Multiple Disabilities could be two different types of physical disabilities, two different mental disabilities, or a combination of physical and mental disabilities. Common examples of Multiple Disabilities are:

Intellectual disability and blindness

- Mental retardation and orthopedic impairment
- [Locomotor disability](#) and speech impairment.

This condition can affect a person so severely that special measures would be required for her developmental and educational needs.

E-tivity 2.2.3- Learners with physical and other health impairments and learners with multiple disabilities

Numbering, and sequencing	2.2.3
Title	Learners with physical and other health impairments and learners with multiple disabilities
Purpose	The purpose of this e-tivity is to enable you to analyze learners with physical and other health impairments and learners with multiple disabilities.
Brief summary of overall task	Read link 1 , link2 , link3 , link 4 , and then watch video 1 video 2 , video 3 and video 4 . After reading the links and watching the videos, define learners with physical and other health impairments and learners with multiple disabilities.
Spark	

Individual task	1. Watch/Read the images above pick out some of the observable characteristics of learners with physical and other health impairments as well as learners with multiple disabilities. Using bullet points list down five causes of physical and other health impairments and five causes of multiple disabilities. 2. Identify three categories of learners with physical and other health impairments. 3. On the discussion forum, discuss how you can identify learners with physical and other health impairments and learners with multiple disabilities.
Interaction begins	Post your answers on the discussion forum 2.2.3. Read what your colleagues have posted. Compare your responses with what your colleagues have posted.
E-moderator interventions	Ensure that learners are focused on the contents and context of discussion Stimulate further learning and generation of new ideas. Provide feedback on the learning progress and close the e-tivity
Schedule and time	This task should take one hour
Next	. Children living under difficult circumstances

2.3 Assessment Questions

1. Identify 5 types of learning disabilities

-dyslexia,

-attention deficit hyperactive disorder (ADHD),

-dyscalculia,

-dysgraphia and

-processing deficits.

2. List down 5 causes of visual impairment

- Macular degeneration—deterioration of the central part of the retina
- Cataracts—clouding of the lens of the eye
- Glaucoma—damage to the nerve connecting the eye to the brain caused by increased pressure inside the eye
- Eye injuries
- Tumors involving the eye or surrounding structures in the head and neck

3. Outline 5 characteristics of learners with emotional and behaviour disorders.

- Development of physical symptoms related to personal problems
- Persistent unhappy or depressed moods
- Lack of personal relationships with peers and adults
- Inability to learn that is not caused by another disability
- Inappropriate behavior or feelings in normal situations

NB/ When a student is classified under emotional disturbance, teachers can expect to see a variety of challenging behaviors. Some of these characteristics are listed below:

- Lack of peer relationships due to fear or anxiety
- Poor attention span
- Low academic performance
- Impulsive behaviors
- Aggression toward self or others
- Poor coping skills and immaturity

4. Describe learners who are deafblind

Concomitant (simultaneous) hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that they cannot be accommodated in special education programs solely for children with deafness or children with blindness.

5. What is the difference between autism spectrum disorder and emotional and behaviour Disorder?

Emotional and Behaviour Disorders (EBD) is a condition in which individuals have trouble with a persistent unhappy mood as well as inappropriate emotional responses and behavior. The condition can also affect social interaction, communication, learning while Autism is a Pervasive Developmental Disorder (PDD)

6. Describe learners who are gifted and talented.

Those persons between the ages of four and twenty-one whose abilities, talents, and potential for accomplishment are so exceptional or developmentally advanced that they require special provisions to meet their educational programming needs. Children under five who are gifted may also be provided with early childhood special educational services”.

LESSON THREE

CHILDREN LIVING UNDER DIFFICULT CIRCUMSTANCES

3.1 Introduction

In this 3rd lesson we will look at children living under difficult circumstances. It is clear from the title above that not all children are lucky enough to live in an environment which provide appropriate stimulation of optimal growth and development. The need to care and protect some children is greater than others due to their specific socio-economic and political circumstances and geographical location. Such children are vulnerable in terms of their right to survival, development, protection and participation. Children in especially difficult circumstances (CEDC) are a worldwide problem. They suffer from deprivation, exploitation and neglect for reasons beyond their contribution or control. Their plight has attracted the attention of the worldwide community, especially professionals in fields of pediatrics, education, social work, psychology as well as psychiatry, legislators, administrators and politicians.

3.2 Lesson Learning Outcomes

By the end of this lesson, you will be able to:

- 3.2.1 Identify children living under difficult circumstances in their localities.
- 3.2.2 Describe various categories of children living under difficult circumstances
- 3.2.3 Analyze factors that lead to children live under difficult circumstances.

3.2.1 Identification of Children Living under Difficult Circumstances

All over the world, child rights lobby groups use different criteria to categorize children as living under difficult circumstances. Some of the indicators used include access to basic needs, recruitment of children in the army, gender (girls) discrimination, coming from minority groups and children living in poverty. Other indicators also include children born and reared in prison, children of teenage mothers as well as children living and working in the streets. These children experience hardships even in times of peace. However, in emergencies, their situation is often more dire and hopeless. Education has the potential to improve the lives of such children through access to formal and informal education or vocational training. to provide them with key life skills.

E-tivity 3.2.1- Identification of children living under difficult circumstances

Numbering, pacing and sequencing	3.2.1
Title	Identification of children living under difficult circumstances
Purpose	The purpose of this e-tivity is to enable you to identify children living under difficult circumstances in your locality
Brief summary of overall task	Read link 1 , link 2 , link 3 , , and then watch video 1 video 2 . After reading the links and watching the videos, come up with a checklist of identifying children living under difficult circumstances.
Spark	
Individual task	Watch/Read the image at the top pick out some of the observable features of children living under difficult circumstances. Compare and contrast life normal circumstances. Reflect on the life of children living under difficult circumstances in your locality and on the discussion forum 3.2.1, discuss how you would identify children living under difficult circumstances in your locality.
Interaction begins	Post your answers on the discussion forum 3.2.1. Read what your colleagues have posted. Critique some of the responses your colleagues

	have posted.
E-moderator interventions	Ensure that learners are focused on the contents and context of discussion Stimulate further learning and generation of new ideas. Provide feedback on the learning progress. And close the e-tivity
Schedule and time	This task should take one hour
Next	Categories of children living under difficult circumstances

3.2.2 Categories of children living under difficult circumstances

Law explorer (2015), has identified over twenty categories of children living under difficult circumstances. The e-tivity below will guide you in isolating the categories and we will be able to establish these categories during our discussion forums.

E-tivity 3.2.2- Categories of children living under difficult circumstances

Numbering, and sequencing	3.2.2
Title	Categories of children living under difficult circumstances
Purpose	The purpose of this e-tivity is to enable you to describe various categories of children living under difficult circumstances.
Brief summary of overall task	Read link 1 , link 2 , and then watch video 1 video 2 . After reading the links and watching the videos, identify any other category of children living under difficult circumstances not covered by the links and videos.
Spark	 
Individual task	Watch/Read and describe images above of children living under difficult circumstances. Compare and contrast the difficult circumstances the two children are in. Reflect on the life of children living under similar circumstances in your

	locality. On the discussion forum, describe five categories of children living under difficult circumstances.
Interaction begins	Post your answers on the discussion forum 3.2.2. Read what your colleagues have posted. Politely, critique some of the responses your colleagues have posted.
E-moderator interventions	Ensure that learners are focused on the contents and context of discussion Stimulate further learning and generation of new ideas. Provide feedback on the learning progress. And close the e-tivity
Schedule and time	This task should take one hour
Next	Causes of children to under difficult circumstances

3.2.3 Causes of Children to Live under Difficult Circumstances

When children's basic needs for food, shelter, education, medical care, and security are not met, they experience life difficulties that predisposes them to malnutrition, diseases and even death. Sometimes disruptive social change can be the principal cause of children in difficult circumstances such displacement, refugee status, marital breakdown, child trafficking and so forth. Rapid urbanization has also been associated with socio-economic, cultural and political transformation has resulted in numerous negative changes such as poverty, disrupting the family and traditional support systems and weakening community cultural organizations. The e-tivity below will discuss all these aspects

E-tivity 3.2.2- Causes of Children to Live under Difficult Circumstances

Numbering, sequencing and	3.2.3
Title	Causes of children to live under difficult circumstances
Purpose	To enable you to analyze factors that lead to children live under difficult circumstances
Brief summary of overall task	Read link 1 , link 2 , link 3 and then watch video 1 video 2 . After reading the links and watching the videos, identify some of the factors that lead children to live under difficult circumstances.

Spark	
Individual task	Watch/Read and describe the difficult circumstance the child in the image above could be in. Identify possible causes of the child to be in that circumstance. Reflect on the plight of children in your locality living under similar circumstances. On the discussion forum, analyze various factors that lead to children live under difficult circumstances.
Interaction begins	Post your answers on the discussion forum 3.2.3. Read what your colleagues have posted. Politely, critique some of the responses your colleagues have posted.
E-moderator interventions	Ensure that learners are focused on the contents and context of discussion Stimulate further learning and generation of new ideas. Provide feedback on the learning progress. Close the e-tivity
Schedule and time	This task should take one hour
Next	We will proceed to lesson four on factors which influence exclusion of learners in regular classrooms

3.3 Assessment Questions

1. Which of the following does not lead to children live under difficult circumstances

- (a) Poverty
- (b) Political stability
- (c) Socio-economic circumstances
- (d) Geographical location

2. Which of the following is not true regarding children living under difficult circumstances?

- (a) They require greater protection than others.
- (b) They are more vulnerable in terms of the risk to their right to survival.
- (c) They suffer from deprivation.
- (d) Social disruption is not common to their lives.

3. Large-scale migration of families from rural to urban areas results to the following except:

(a) Nourished children

(b) Pavement dwellers

(c) Displaced children

(d) Evicted children

4. Which of the following is not a characteristic of a domestic child worker?

(a) Long working hours

(b) Meagre food and wages

(c) Physical well being

(d) Sexual torture

5. Children in conflict with law is a category of children living under difficult circumstances. A just juvenile justice system should do the following to direct children away from judicial proceedings except:

(a) Promote reconciliation

(b) Involve the family members and the community

(c) Promote punishment

(d) Promote counselling services

LESSON FOUR

FACTORS INFLUENCING EXCLUSION OF LEARNERS IN REGULAR CLASSROOMS

4.1 Introduction

Researchers view the process of educational exclusion from a broad point of view. The French literature, for example, is concerned about the high relationship between social cohesion and education inequalities (Duru-Bellat2010). Proponents of this approach explore different ways by which educational institutions and authorities produce unequal trajectories for students and reflect on the conception of justice underlying different educational principles (Dubet2004). Spanish authors (Escudero, 2005; Escudero and Martínez, 2012), on the other hand have developed specific definitions of educational exclusion as cumulative processes leading to unequal access to educational contents, experiences, and learning that hampers the attainment of the right to a meaningful education. So the very school order, is highlighted in the production of educational exclusion. This lesson will therefore address three factors that influence exclusion of learners in regular classrooms mainly; the school, teacher and learner factors

4.2 Expected Learning Outcome

By the end of this lesson, you will be able to;

4.2.1 Identify different school factors that influence exclusion

4.2.2 Evaluate teacher factors that influence exclusion

4.2.3. Discuss the learner factors that influence exclusion

4.2.1 School factors that influence exclusion in regular classrooms

Children can be excluded as a punishment for bad behavior. The exclusion may be temporary (fixed term, otherwise known as suspension) or permanent (also known as expulsion). The decision to exclude a child may be taken by the head teacher, although they're likely to consult with other staff members such as classroom teachers or house teachers to gather their opinions. Exclusion should only happen as a last resort and after a thorough investigation. There are other school factors that you will be able to find out in this lesson.

4.2.1 E-tivity 4.2.1 School factors that influence exclusion in regular classrooms

Numbering and sequencing	4.2.1
Title	School factors that influence exclusion in regular classrooms
Purpose	The purpose of this e-tivity is to enable you to identify different school factors that influence exclusion
Brief summary of overall task	Read Link journal, document and publication on school factors that influence exclusion
Spark	 school factors that influence exclusion
Individual task	(a) Using bullet points identify school factors that influence exclusion (b) In a sentence, identify ways through which some of these challenges can be solved and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	a) Post on discussion forum 4.2.1 b) Provide positive and constructive feedback on the team, learners' views and ideas.
E-moderator interventions	1.Ensure that learners are focused on the contents and context of discussion.2. Stimulate further learning and generation of new ideas. 3.Provide feedback on the learning progress. 4.Close the e-tivity

Schedule and time	This task should take one hour
Next	Teacher factors that influence exclusion

4.2.2 Teacher factors that influence exclusion

Classroom mechanisms of educational exclusion refer to the daily interactions between teachers and students and are fundamental to teachers' beliefs, expectations, and practices. As several authors have demonstrated (Rist1970; Van Houtte2011) that teachers' expectations are essential in opening up or closing off students' educational opportunities. Teachers vary in their ability to create positive teacher-student relationships. Some teachers simply have an easier time developing positive relationships with students' personality, feelings toward students, their own relationship histories may all play a role.

E-tivity4.2.3 Teacher factors that influence exclusion

Numbering, and sequencing	4.2.2
Title	Teacher factors that influence exclusion
Purpose	The purpose of this e-tivity is to enable you to evaluate teacher factors that influence exclusion
Brief summary of overall task	Read document on teacher factors that influence exclusion
Spark	 teacher factors that influence exclusion
Individual task	(a) Using bullet points evaluate teacher factors that influence exclusion (b) In a sentence, discuss one and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	a) Post on discussion forum 4.2.2. b) Provide positive and constructive feedback on the team, learners' views and ideas.

E-moderator interventions	1.Ensure that learners are focused on the contents and context of discussion.2. Stimulate further learning and generation of new ideas.3. Provide feedback on the learning progress.4.Close the e-tivity
Schedule and time	This task should take two hours.
Next	Learner factors that influence exclusion

4.2.3. Learner factors that influence exclusion

Research has established that student's unique characteristics often influence their learning. For instance, students who exhibit problem behaviors at home and school tend to develop conflicts and negative relationships with their teachers (Birch & Ladd, 1998; Murray & Murray, 2004; O'Connor et al., 2012). Such characteristics have adverse effects on students' inclusion and learning. You will learn more in the e-tivity below.

E-tivity 4.2.3 Learner factors that influence exclusion

Numbering and sequencing	4.2.3
Title	Learner factors that influence exclusion
Purpose	To enable you to discuss Learner factors that influence exclusion.
Brief summary of overall task	Read this journal on Learner factors that influence exclusion
Spark	 Learner factors and exclusion
Individual task	(a) Using bullet points discuss Learner factors that influence exclusion (b) In a paragraph, identify possible solution to the learner factors identified above and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	a) Post on discussion forum 4.2.3 b) Provide positive and constructive feedback on the team, learners' views and ideas.

E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion. 2. Stimulate further learning and generation of new ideas. 3. Provide feedback on the learning progress. 4. Close the e-tivity
Schedule and time	This task should take one hour
Next	Societal factors which influence exclusion of learners in regular classrooms

4.3 Assessment Questions

1. The following are school factors that may contribute to exclusion of learners in regular

Classroom which one is the odd one out

A School rules and regulations

B School meals

C School Curriculum

D School environment

5 The possible solutions one can offer on school factors leading to exclusion in regular classrooms

A Involve stakeholders in the education of learners

B Develop appropriate policy of inclusion

C Use the locally available resources

D All the above

6 As a teacher, which one of the following is not teacher factor that can contribute to exclusion of learners in regular classroom

A Teachers' attitude

B Teachers' culture

C Teachers' qualification

D All the above

7 All are student factors that may lead to exclusion of learners in regular classrooms, which one is not?

A student's behavior

B student's ability

C Student's siblings

D Student's age

LESSON FIVE

SOCIO-CULTURAL FACTORS INFLUENCING EXCLUSION OF CHILDREN IN EDUCATION

5.1 Introduction

There are many socio-cultural factors which influence exclusion of children in regular classrooms. Some of the factors are poverty, ethnicity, gender, disability, family structure and other difficult circumstances. Let's look at how each affects inclusion.

5.2 Expected learning outcomes

By the end of this lesson, you should be able to:

1. Identify socio-cultural factors which influence exclusion of children from education
2. Explain how these factors impact on inclusive education
3. Explain how children living in difficult circumstances can be included in education

5.2.1 Socio-cultural factors which influence exclusion of children from education

UNESCO (2011) suggests that education is the most basic insurance against poverty. It argues that people are empowered with knowledge, skills and the confidence they need to shape their better futures. Mattei (1996, as cited in Kadenyi & Kariuki, 2011), asserts that education should bring one's personal potentials and the ways for actualizing them. In line with this demand nations all over the world have invested heavily in the education sector to enhance improved access. UNICEF (2011) affirms that the achievement of universal quality education for every child has been long journey following decades of reaffirmations and commitments. It however notes that about 67 million children of primary school age and 72 million lower secondary school students were still out of school by 2009. Factors responsible for these learners not accessing education include lack of fees, biased selection processes, opportunity costs and other social factors. There are also many socio-cultural factors which influence exclusion from education. Some of the factors are poverty, ethnicity, gender, disability, family structure and other difficult circumstances. Let's look at how each affects inclusion.

E-tivity 5.2.1 Socio-cultural factors influencing exclusion from education

Numbering, and sequencing	5.2.1
Title	Socio-cultural factors influencing exclusion from education
Purpose	To enable you identify the socio-cultural factors which influence exclusion of children from education systems.
Brief summary of overall task	Read content in this link 1, Link 2 and Watch video by consortium for education communication New Delhi, India.
Spark	

Individual contribution	Watch the video and briefly explain four factors discussed in the video
Interaction begins	Post your answers on the discussion forum. Read what your colleagues have posted, provide positive and constructive feedback on the team learners view and ideas in this forum
E-moderator interventions	Focusing group discussion. Encouraging Lurkers (quiet ones) to contribute. Providing feedback/teaching points, Summarise and end activity
Schedule and time	Task takes one hour
Next	We will look at how socio-cultural exclusion factors affect inclusive education

5.2.2 Effects of socio-cultural exclusion on inclusive education

Poverty is defined in several ways. Poverty can be defined as when the individual or family income is less than the income threshold set by the US Census Bureau (2015). Poverty can be conceptualized as lack of opportunity, exposure, racial inequality and constant struggle with social problems e.g. educational failure, teen pregnancy, single parenting, unemployment, inadequate housing, homelessness, substance abuse AIDS etc. With poverty individuals become victims of the above risk factors.

Poverty can occur at an age regardless of gender and race. Amount of money one has is not the main determinant to success, however it can enhance to quality of life in order to meet the demands of today's world. Poverty can affect inclusive education in the following ways: inadequate learning environment, limited community resources, negative attitude towards learners with special needs in the class, increased segregation i.e. special education schools and alternative schools. Poverty can also lead to loss of hope, high level of drug abuse, gang involvement, crime, teenage pregnancies, poor health care and high levels of stress.

E-tivity 5.2.2 Effects of socio-cultural exclusion on inclusive education

Numbering and sequencing	5.2.2
Title	Effects of socio-cultural exclusion on inclusive education
Purpose	To enable you explain how various socio-cultural exclusion factors affect inclusive education
Brief summary of overall task	Read this Link on social exclusion, children and education by Stephan Klasen and watch this Video on the in depth education disability and poverty. Explain how poverty affects inclusive education
Spark	
Individual contribution	From the video above on education, disability and poverty, explain three issues discussed in the video on poverty and inclusive education
Interaction begins	Post your answers on the discussion forum. Read what your colleagues have posted. Provide positive and constructive feedback on the team learners view and ideas in this forum
E-moderator interventions	Focusing group discussion. Encouraging Lurkers (quiet ones) to contribute. Providing feedback/teaching points. Summarise and end E-tivity
Schedule and time	Task take one hour
Next	We will learn how children living in difficult circumstances can included in education

5.2.3 How children living in difficult circumstances can be included in education

The teacher and the family can support children's recovery in various ways in the family, in school and in the community. A good school-family relationship helps children in the process of learning and recovery. This relationship can be through talking with the children's families so that the teacher can find out about the conditions in which they are living and to discuss with the parents how they can encourage their children's development. School meetings with parents or guardians to discuss the effects of war or social conflicts on children's development and/or possible ways of supporting affected children

Teachers can Encourage the parents or guardians to talk freely about such conversational topics as: their present life (or lack of food, clothing, support and so on); their previous life, where they lived, the difficulties of that time; their difficulties with the children their difficulties in educating children in time of war; their main worries.

Teachers can also mobilize the community for the children's recovery, even if they do not go to school. Among the ways of encouraging the community's involvement are: organizing meetings at the school with the various local authorities to explain the effects of war and other difficult situations on children's development, and possible ways towards their recovery and rehabilitation; re-opening schools wherever possible; building more classrooms and other school buildings; organizing a parent's committee in the school; organizing a programme of activities that are useful both to pupils and the community, such as assistance given by pupils to widows and old people in building their houses and clearing their fields.

E-tivity 5.2.3 How children living in difficult circumstances can be included in education

Numbering and sequencing	5.2.3
Title	How children living in difficult circumstances can included in education
Purpose	To enable you understand how children living in other difficult circumstances can included in education

Brief summary of overall task	Read information in this link and write short notes on strategies of including children living in difficult circumstances in education. Watch video on One Woman who reinvented school to combat poverty in relation to inclusive education
Spark	
Individual contribution	Watch video1 on Kenya's street children video2 on from street in Nairobi to a teacher in Hamburg and video 3 on Maasai life through a child's eye. In bullet points, explain three issues discussed in the videos in relation to inclusive education
Interaction begins	Post your answers on the discussion forum. Read what your colleagues have posted. Provide positive and constructive feedback on the team learners view and ideas in this forum
E-moderator interventions	Focusing group discussion. Encouraging Lurkers (quiet ones) to contribute and providing feedback/teaching points. Summarise and end E-tivity
Schedule and time	Task takes one hour
Next	Assessment of curriculum and teaching strategies in inclusive settings

5.3 Assessment Questions

1. Discuss five socio-cultural factors that influence exclusion of children from education.

- Pupils' personal characteristics: prior attainment, gender, health;
- Socio-economic: low income and poverty (eligibility to free school meals), parental unemployment, social class (father's occupation) and housing (e.g. overcrowding);
- Educational: parents' educational attainment – qualifications and basic skills;

- d. Family structure: family size, lone parent status, institutional care;
- e. Ethnicity/Language: ethnic group, fluency in English;
- f. Other: parental interest / involvement /practice, locally based factors.

2. Describe how family structure affects children's education

- a. Family size affects parents' ability to provide education to all children. The boy child may be favoured while the girl child may be subjected to child labour to compliment family resources.
- b. Single parent raring sometimes overwhelms and sometimes children rebel in protest of the missing parent-figure. Teasing and prejudice may also predispose such children from opting out of school.

3. Identify eight categories of children living under very difficult circumstances

- a. Children living in poverty
- b. Child labourers
- c. Children living in the streets
- d. Child refugees
- e. Displaced children
- f. Orphans and institutionalized children
- g. Children affected and infected by HIV/AIDS
- h. Children from marginalized communities
- i. Children involved in war as child soldiers

4. Mention four ways children in difficult circumstances can be restored to access education

- a. Organizing meetings at the school with the various local authorities to explain the effects of war and other difficult situations on children's development.
- b. Suggesting possible ways towards their recovery and rehabilitation;
- c. Building more classrooms and other school buildings to accommodate children in difficult circumstanced;
- d. Organizing parents' committee in the school to be responsive of the plight of all children
- e. Organizing a programme of activities that are useful both to pupils and the community such as school feeding, provision of basic necessities and social skills.

5. Give three reasons for children to desert and opt to live in the streets

- a. Poverty and neglect
- b. Broken families where children are left under the care of harsh stepmothers/fathers
- c. Breakdown of traditional rearing practices where extended family members took responsibility of rearing orphans after loss of parents
- d. Truancy and peer pressure after failing to gain meaningful education in school

LESSON SIX

ASSESSMENT OF CURRICULUM AND TEACHING STRATEGIES IN INCLUSIVE SETTINGS

6.1 Introduction

In this lesson, we will focus attention on definitions of terms such as assessment and curriculum. You will also learn about assessment of curriculum and teaching strategies in inclusive settings.

6.2 Lesson Learning Outcomes

By the end of this lesson, you will be able to:

- 6.2.1 Define various terms.
- 6.2.2 Discuss ways of assessing curriculum in Inclusive Settings
- 6.2.3 Assess teaching strategies in Inclusive Settings

6.2.1 Definitions of Terms

Assessment is the process used in special education to determine a child's specific learning strengths and needs, in order to determine whether or not a child is eligible for special education services. In general education, the term assessment refers to the wide variety of methods or tools that educators use to evaluate, measure, and document the academic readiness, learning progress, skill acquisition, or educational needs of students.

Curriculum has been defined as “the planned learning experiences that have intended educational outcomes” (Hoover,1988). Armstrong (1990) refers to it as “master plan for selection of content and organizing learning experiences for the purpose of changing and developing learners’ behaviors and insights”. Curriculum can also be defined as the content and sequence of the knowledge and skills to be taught in an area of instruction. It involves careful selection of content, organization of the content in the manner it will be offered and focus on the educational outcomes expected and how the outcomes will be evaluated.

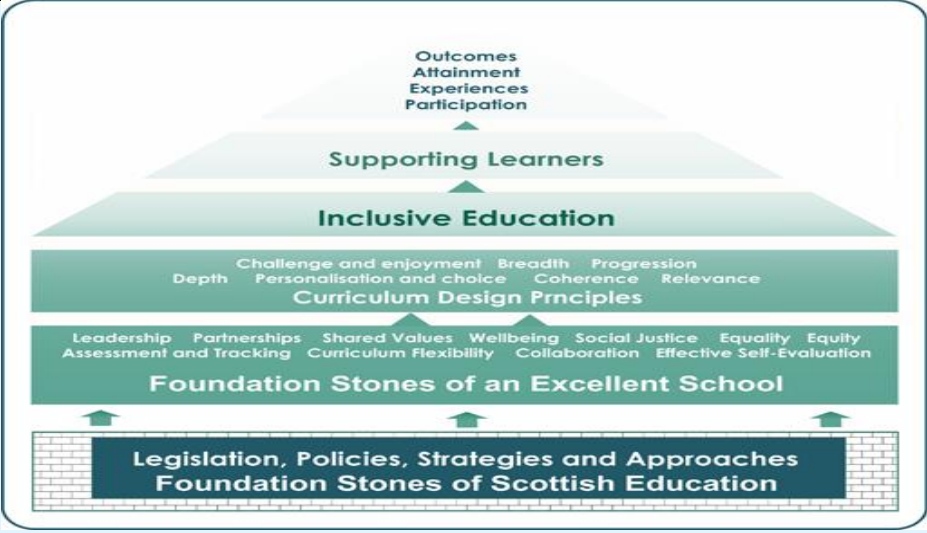

E-tivity 6.2.1 – Definition of Terms

Numbering, pacing and sequencing	6.2.1
Title	Definition of Terms
Purpose	To enable you to define the terms assessment and curriculum
Brief summary of overall task	Watch a video on Inclusive Classrooms by NIOS Senior Secondary Courses (2018) and define the terms assessment and curriculum.
Spark	
Individual task	(a) Using bullet points define the terms assessment and curriculum (b) In a sentence, define the terms assessment and curriculum in your own words and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	a) Post on discussion forum 6.2.1 definition of the terms assessment and curriculum b) Provide positive and constructive feedback on other learners' views and ideas.
E-moderator interventions	1 Ensure that learners are focused on the contents and context of discussion. 2 Stimulate further learning and generation of new ideas. 3 Provide feedback on the learning progress. 4 Close the e-tivity
Schedule and time	This task should take one hour
Next	Assessment of Curriculum in Inclusive Education

6.2.2 Assessment of Curriculum in Inclusive Settings

An inclusive classroom cannot be fully achieved without assessment of the curriculum to accommodate all students. Teachers must be committed in developing an understanding of their student's needs and on how to use assessment in a manner that ensures respect for the individual while maintaining high expectations for participation and learning outcomes. Loreman, Deppeler and Harvey (2010) emphasize that teachers should assess all aspects of their teaching and classroom organization in order to promote inclusive teaching practices. If the needs of students who have difficulties with learning are expected to be met in inclusive classrooms, then it is important to assess those factors that impact upon learning outcomes. Teachers hence, need to conduct assessment broadly by investigating influences of teaching outcomes, environment and resources to ascertain effective learning experience in inclusive classrooms

E-tivity 6.2.2 Assessment of Curriculum in Inclusive Settings

Numbering and sequencing	6.2.2
Title	Assessment of Curriculum in Inclusive Settings
Purpose	To enable you to discuss ways of assessing Curriculum in Inclusive Settings.
Brief summary of overall task	Watch a video on Education of Children with Special needs and discuss ways of assessing Curriculum in Inclusive Settings.
Spark	

Individual task	(a) Discuss ways of assessing Curriculum in Inclusive Settings. (b) Individually, discuss ways of assessing Curriculum in Inclusive Settings and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	1. Post on the discussion forum 6.2.2 ways of assessing Curriculum in Inclusive Settings. 2. Provide positive and constructive feedback on the team learners 'views and ideas.
E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion, stimulate further learning and generation of new ideas. 2. Provide feedback on the learning progress and close the e-tivity.
Schedule and time	This task should take one hour
Next	Teaching strategies in Inclusive Settings

6.2.3 Teaching Strategies in Inclusive Settings

Inclusive learning facilitates access to flexible learning choices for all students. It also offers effective paths for achieving educational goals and makes all students experience a sense of belonging. An inclusive education environment ensures that all children, regardless of ability or disability, learn together in the same age-appropriate classroom and participates fully in their learning processes.

To [create an inclusive education environment in classroom](#), calls for removal of curriculum barriers and presenting educational goals in interesting ways to engage all learners and serve all students equitably. This can be done using various teaching strategies when designing an inclusive classroom and curriculum.

E-tivity 6.2.3 Teaching Strategies in Inclusive Settings

Numbering, pacing and sequencing	6.2.3
Title	Teaching Strategies in Inclusive Settings
Purpose	To enable you to assess various teaching strategies in inclusive settings
Brief summary of overall task	Read this Link and assess various teaching strategies in inclusive settings

Spark	
Individual task	(a) Assess various teaching strategies in inclusive settings. (b) Individually assess various teaching strategies in inclusive settings and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	1. Post on discuss forum 6.2.3 various teaching strategies in inclusive settings. 2. Provide positive and constructive feedback on other learners' views and ideas.
E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion. 2. Stimulate further learning and generation of new ideas. 3. Provide feedback on the learning progress. 4. Close the e-tivity
Schedule and time	This task should take two hours
Next	Adoption, Modification and Accommodation of Learners in Inclusive Settings

6.3 Assessment Questions

1. Define the following terms:

(a) Assessment - to determine a child's specific learning strengths and needs, in order to determine whether or not a child is eligible for special education services

(b) Curriculum - the content and sequence of the knowledge and skills to be taught in an area of instruction.

2. Discuss ways of assessing curriculum in Inclusive Settings

- Investigate influences of teaching outcomes, environment and resources to provide an effective learning experience in inclusive classrooms

3. Assess various teaching strategies in Inclusive Setting

- Cooperative learning, Project, Task analysis, Peer- Tutoring, I.E.P

LESSON SEVEN

ADOPTION, MODIFICATION AND ACCOMMODATION OF CURRICULUM FOR LEARNERS WITH SPECIAL NEEDS IN INCLUSIVE SETTINGS

7.1 Introduction

In this lesson, we will focus attention on Adoption, Modification and Accommodation in the curriculum for learners with special needs in Inclusive Settings.

7.2 Lesson Learning Outcomes

By the end of this lesson, you will be able to:

- 7.2.1 Explain various terms and concepts.
- 7.2.2 Discuss ways of adopting the curriculum in Inclusive Settings
- 7.2.3 Discuss various modifications of the curriculum in Inclusive Settings
- 7.3.4 Discuss ways of accommodating learners with special needs in Inclusive settings

7.2.1 Definitions of Terms and Concepts

Here we explain various terms and concepts such as adoption, modification and accommodations of the curriculum for learners with special needs in inclusive settings.

E-tivity 7.2.1 – Definition of Terms and Concepts

Numbering, pacing and sequencing	7.2.1
Title	Definition of terms and concepts
Purpose	To enable you explain terms and concepts such as adoption, modification and accommodation
Brief summary of overall task	Read this Link by Zainab (2018) and explain terms and concepts such as adoption, modification and accommodation of the curriculum
Spark	Read this Link and explain the terms and concepts

Individual task	(a) Using bullet points explain terms and concepts such as adoption, modification and accommodation (b) In a sentence, explain terms and concepts such as adoption, modification and accommodation in your own words and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	c) Post on discussion forum 7.2.1 definition of terms and concepts such as adoption, modification and accommodation. d) Provide positive and constructive feedback on the team, learners' views and ideas.
E-moderator interventions	Ensure that learners are focused on the contents and context of discussion. Stimulate further learning and generation of new ideas. Provide feedback on the learning progress. Close the e-tivity
Schedule and time	This task should take one hour
Next	Adopting the curriculum in Inclusive Settings

7.2.2 Adopting the curriculum in Inclusive Settings

Adopting the curriculum refers to using the existing curriculum as it is with minimal modifications.

E-tivity 7.2.2 Adopting the curriculum in Inclusive Settings

Numbering, and sequencing	7.2.2
Title	Adopting the curriculum in Inclusive Settings
Purpose	The purpose of this e-tivity is to enable you to discuss ways of adopting the curriculum in Inclusive Settings.
Brief summary of overall task	Watch a video on inclusive classroom and discuss ways of adopting the curriculum in Inclusive Settings. .
Spark	Read this link on inclusive education for more information on adoption of curriculum
Individual task	(a) Discuss ways of adopting the curriculum in Inclusive Settings. (b) Individually, discuss ways of adopting the curriculum in Inclusive Settings and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	6 Post on the discussion forum 7.2.2 ways of adopting the curriculum in Inclusive Settings. 7 Provide positive and constructive feedback on the team learners

	‘views and ideas.
E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion.2. Stimulate further learning and generation of new ideas. 3. Provide feedback on the learning progress. 4. Close the e-tivity
Schedule and time	This task should take one hour
Next	Modifications of the curriculum in Inclusive Settings

7.2.3 Modifications of the Curriculum in Inclusive Settings

There is no single definition of curriculum modification and definitions vary across disciplines. Curriculum modification can be defined as modified content, instruction, and/or learning outcomes to meet diverse students’ needs. Curriculum modification is not limited to instructional modification or content modification but includes a continuum of a wide range of modified educational components. Modifying existing general curriculum has been an effective way to create more accessible learning environments to support all students and their teachers in various educational contexts.

E-tivity 7.2.3 Modifications of the Curriculum in Inclusive Settings

Numbering, and sequencing	7.2.3
Title	Modifications of the Curriculum in Inclusive Settings
Purpose	To enable you to discuss various modifications of the Curriculum in Inclusive Settings
Brief summary of overall task	Read this link and discuss various modifications of the Curriculum in Inclusive Settings.
Spark	

Individual task	(a) Discuss various modifications of the Curriculum in Inclusive Settings (b) Individually discuss various modifications of the Curriculum in Inclusive Settings and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	1. Post on discuss forum 7.2.3 various modifications of the Curriculum in Inclusive Settings. 2. Provide positive and constructive feedback on other learners' views and ideas.
E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion. 2. Stimulate further learning and generation of new ideas. 3. Provide feedback on the learning progress.4. Close the e-tivity
Schedule and time	This task should take one hour
Next	Accommodation of Learners with special needs in Inclusive Settings

7.2.4 Accommodation of Learners with Special Needs in Inclusive Settings

The term accommodation is used to mean a modification to the delivery of instruction or method of student performance and does not change the content or conceptual difficulty of the curriculum. Both teachers and students can play a role in the changes to instructional methods in order to achieve the same intended instructional outcomes suggested in general curriculum. Examples of accommodation are countless. Some include incorporating different types of teaching devices and techniques (such as use of audio or other formats as an alternative to print), technology, graphic organizers, and pictorial representation; and changing the amount of input, time-frame for learning, and levels of support for individual students' needs.

E-tivity 7.2.4 Accommodation of Learners with Special Needs in Inclusive Settings

Numbering, and sequencing	7.2.4
Title	Accommodation of Learners with Special Needs in Inclusive Settings
Purpose	To enable you to discuss ways of accommodating learners with special needs in Inclusive settings
Brief summary of overall task	Read link 1 and link 2 then discuss ways of accommodating learners with special needs in Inclusive settings.

Spark	
Individual task	(a) Discuss ways of accommodating learners with special needs in Inclusive settings (b) Individually discuss ways of accommodating learners with special needs in Inclusive settings and save it in a portfolio that can be accessed by your facilitator if required.
Interaction begins	1. Post on discuss forum 7.2.4 ways of accommodating learners with special needs in Inclusive settings 2. Provide positive and constructive feedback on the team, learners' views and ideas.
E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion. 2. Stimulate further learning and generation of new ideas. 3. Provide feedback on the learning progress and close the e-tivity
Schedule and time	This task should take one hour.
Next	Collaborations with Related Service Providers

7.3 Assessment Questions

1. Explain meaning of the following terms in relation to curriculum in Inclusive Settings:

- (a) **Adoption** - refers to using the existing curriculum as it is with minimal modifications.
- (b) **Modification** – Refers to modified content, instruction, and/or learning outcomes to meet diverse students' needs.
- (c) **Accommodations** - means modification to the delivery of instruction or method of student performance and does not change the content or conceptual difficulty of the curriculum.

2. Discuss ways of adopting the curriculum in Inclusive Settings.

Using the existing curriculum as it is but can make a few changes depending on the learners needs.

3. Discuss various modifications of the curriculum in Inclusive Settings –

- Modifying content, instruction, and/or learning outcomes to meet diverse students' needs.

4. Discuss ways of accommodating learners with special needs in Inclusive settings-

incorporating different types of teaching devices and techniques (such as use of audio or other formats as an alternative to print), technology, graphic organizers, and pictorial representation; and changing the amount of input, time-frame for learning, and levels of support for individual students' needs.

LESSON EIGHT

COLLABORATION WITH STAKEHOLDERS AND ENVIRONMENTAL MODIFICATION IN INCLUSIVE EDUCATION

8.1 Introduction

In this lesson, we will look at the need for stakeholders in Inclusive Education. Identify the stakeholders and their roles in Inclusive Education programmes

8.2 Lesson Learning outcomes

By the end of this lesson, you should be able to:

- Identify the need for stakeholders in Inclusive Education
- Identify the stakeholders and their roles in Inclusive Education programmes
- Explain environmental modifications in inclusive education

8.2.1 The Need for Stakeholders in Inclusive Education

Stakeholders in inclusive education are persons with a claim in the education of the learners in inclusive settings. They participate in ensuring the education program succeed and in managing schools. They are the partners in making the schools conducive to teaching and learning and also for the achievement of the learning outcomes through their active participation in school activities, programs and projects.

Activity 8.2.1 The Need for Stakeholders in Inclusive Education

Numbering and sequencing	8.2.1
Title	The Need for Stakeholders in Inclusive Education
Purpose	To Identify the need for stakeholders in Inclusive Education

E-moderator interventions	Focusing group discussion Encouraging Lurkers (quiet ones) to contribute Providing feedback/teaching points Summarise E-tivity
Schedule and time	Task takes one hour.
Next	Stakeholders and their Roles in Inclusive Education Programmes

8.2.2 Stakeholders and their Roles in Inclusive Education Programmes

There are several stakeholders in inclusive education. These include: Learners, parents, government, teachers, communities and non-governmental organizations.

Learners are the primary stakeholders in inclusive education. Learners can be facilitated to contribute their knowledge, skills and perspectives on inclusive education. They can be involved in planning, monitoring or directing their own education. Parents on the other hand, have the

responsibility to act in the best interest of their children, though in some cases legal guardians or agencies may act on the child's behalf. Parents and families could assist the school in various ways, such as developing teaching materials required by the child, standing in as teacher's assistants or volunteers.

Government

The government is a key stakeholder as it provides legislation and formulate the policies for inclusive education, develop curriculum, curriculum materials and provide personnel needed in the education programmes. It also plays a key role in provision of funds, training of personnel and encouraging collaboration with other stakeholders. While teachers besides teaching act as role models to their learners, participate in curriculum development, develop curriculum material and provide curriculum implementation support.

Communities

These refers people in the schools' locality who are involved with the school and its inclusive activities. They can participate in the education of their children through involvement of their community leaders, families and local resources. On the other hand,

Non-governmental organizations engage in advocacy, demanding that governments uphold their commitment and obligation to provide education for all children, including children with disabilities. NGOS such as Disabled Peoples' Organizations and Families can assist schools and governments in making better decisions in regards to students with disabilities in inclusive settings. they also participate in provision of funds, development of curriculum and curriculum materials.

E-tivity 8.2.2 Stakeholders and their Roles in Inclusive Education Programmes

Numbering and sequencing	8.2.2
Title	Stakeholders and their roles in inclusive education programmes
Purpose	To identify stakeholders and their roles in inclusive education programmes
Brief summary	Watch Video by E Chako I. (2020) Inclusive Education 21

of overall task	Stakeholders of Inclusive Education and their Responsibilities, Education Media Research Centre, Madurai Kamaraj University, briefly list down the various stakeholders and their roles in inclusive education

Interaction begins	Post your answers on the discussion forum Read what your colleagues have posted Provide positive and constructive feedback on the team learners view and ideas in this forum
E-moderator interventions	Focusing group discussion Encouraging Lurkers (quiet ones) to contribute Providing feedback/teaching points Summarise E-tivity
Schedule time	Task takes one hour.
Next	Environmental modifications in inclusive education

8.2.3 Environmental modifications in inclusive education

The success for any student is influence by the adaptations, accommodations and modifications made to the learning environment, instructions and other classroom activities. Some adaptations

are simple as moving a distractible student to the front of the class or away from a pencil sharpener or the window.

Adaptations, accommodations and modifications need to be individualized for students based on their needs, personal learning styles and interest. It is not always obvious what adaptations, accommodations and modifications would be beneficial for a particular learner or how changes in the curriculum, the classroom setting or evaluation might be made.

Adaptations, accommodations and modifications help to address the unique needs of the child that results from the child's disability. This ensures the child is able to access the general curriculum. Modifications can be done on what a child is taught or on how the child works in school. Other accommodations include giving the student extra time to complete tasks, breaking up tasks over several days, modification of materials such as providing audio taped lectures or books, using large print books or digital text etc

E-tivity 8.2.3 Environmental modifications in inclusive education

Numbering and sequencing	8.2.3
Title	Environmental modifications in inclusive education
Purpose	To enable you understand the various Environmental modifications in inclusive education

LESSON NINE

CHALLENGES AND BARRIERS TO INCLUSIVE EDUCATION

9.1 introduction

While the current trend and world order is moving towards inclusive education, there are several challenges working against it. Some of them are within school while others are external. Infrastructure in the outside community and culture have among other factors frustrated inclusion of learners with exceptional needs. Parents rigidity and stigma have also made it hard for effective inclusive education to take place. Some parents hide their children with disabilities at home while other parents with typical children do not want their children to be taught amongst children with disabilities. They are insensitive to their plight. While school factors have been covered elsewhere in this module, it is worth mentioning that poor teacher training, rigid curriculum and teacher attitudes have also worked against inclusive education. In this lesson we look at the challenges and barriers to inclusive education but with a bias to the ones outside school.

9.2 Lesson Learning outcomes

By the end of this lesson, you will be able to

9.2.1 Explain key barriers to inclusive education in Kenya

9.2.1 Describe possible solutions to address the challenges

9.2.1 Key barriers to inclusive education in Kenya

Kenya is a developing country and its education structures for typical students is still developing. It is therefore a challenge for children with exceptional needs if the government is still struggling to meet international standards for learners with typical needs. We do not have clear policies on

inclusive education either. Funds are scarce and corruption is also common. Monitoring is also a challenge. In this lesson we look at the barriers currently encountered in in Kenya.

E-tivity 9.2.1

Numbering, and sequencing	9.2.1
Title	Challenges and barriers to inclusive education in Kenya
Purpose	The purpose of this e-tivity is to enable you explain the challenges and barriers to inclusive education in Kenya
Brief summary of overall task	a) Read the material in the link below and write a summary of the content in bullet form. 1. Challenges and barriers , 2. Document two b) b). Now watch the videos below and summarize in bullet form the key points. Video 1 , video 2
Spark	
Individual task	a) Write a two-page summary on the challenges facing inclusive education in Kenya.
Interaction begins	Discuss five major challenges facing implementation of inclusive education in Kenya. Post your responses in the discussion forum. Read responses from two other students and write a comment. Post your responses in the discussion forum
E-moderator interventions	1. Ensure that learners are focused on the contents and context of discussion. 2. Stimulate further learning and generation of new ideas. 3. Provide feedback on the learning progress. 4. Round-up the e-tivity

Schedule time	This task should take two hours
Next	Addressing challenges

9.2.2 Addressing Barriers to inclusive education in Kenya

In the immediate earlier lesson, we looked at financial, infrastructural and cultural barriers among others. These are the hardships implementers of inclusive education are facing. The government must look for ways of addressing these difficulties. In this lesson we look at the attempts that the government has and should put in place to address the difficulties. The ideal goal is to have no child left behind and ensure that each child with or without disabilities has access to education and in inclusive setting.

E-tivity 9.2.2

Numbering, and sequencing	9.2.2
Title	Addressing Challenges and barriers to inclusive education in Kenya
Purpose	The purpose of this e-tivity is to enable you explain the strategies the government should use to address challenges and barriers to inclusive education in Kenya
Brief summary of overall task	Google and search the articles below (1) Barriers to Parental/Family Participation in the Education of a Child with Disabilities in Kenya and The national Special Education Frame work (2009), Final Draft Kenya. Write a summary on the suggested solutions to address barriers to inclusive education then watch the videos below and summarize in bullet form the key points. Video 1 , Video 2
Spark	
Individual task	Write a two-page advisory paper to the ministry of education on five major suggestions on how to address current challenges and solutions to inclusive education. Post your response of line.
Interaction begins	1. Discuss five major measures that the government of Kenya should take to address the current barriers to inclusive Education. Give an opinion why the government has not been able to successfully address the challenges. Post your responses online. 2. Read responses from two other students and write a comment. Post

	your responses in the discussion forum
E-moderator interventions	Ensure that learners are focused on the contents and context of discussion, Stimulate further learning and generation of new ideas, Provide feedback on the learning progress and Round-up the e-tivity
Schedule and time	This task should take two hours
Next	Instruments of reform

9.3 Assessment Questions

1. Explain what you understand by the term barrier.

A barrier is something, material, whether man made or natural that blocks or is intended to block passage or that which makes it hard for an activity to be done easily. In this context, anything that makes it hard to implement inclusion is a barrier

2. Name five barriers to inclusive education in Kenya

- Poorly trained personnel
- Cultural barriers
- Lack of awareness of what inclusion entails
- Poor funding
- Unfavorable teacher student ratio
- Lack of political will

3. Give ten suggestions on what the ministry of education should do to mitigate barriers to inclusive education.

- Train more teachers
- Increase funding to schools
- Educate stake holders
- Fight cultural barriers
- Bench marks with developed world
- Invest more money on research in inclusion

- g. Explain three roles that parents should play in promoting inclusive education.
- h. Provide learners with necessary materials
- i. Creation of awareness within the community
- j. Be role models
- k. Collaborate with teachers and school
- l. Help fight stigma related to disability

LESSON TEN

REFORM INSTRUMENTS

10.1 Introduction

Inclusive education is not a Kenya affair. The entire world is heading towards this direction. Through the United Nations, the world has in place some guiding framework to ensure that the entire world remains guided on this. On the same note, Kenya also has its own legal framework to help achieve the same goals. It has ratified numerous treaties and conventions. In this lesson we will look at both international and local instruments that address inclusive education. The ultimate goal is to have the entire world embrace inclusive education.

10.2 Lesson Learning Outcomes

By the end of this lesson, you will be able to

10.2.1 Explain international instruments in inclusive education.

10.2.2 Describe local constitutional instruments guiding on inclusive education

International instruments

10.2.1 Explain instruments in inclusive education.

As mentioned earlier we have international frameworks guiding on inclusive education. In this lesson we will look at the human rights aspect of inclusive education as well as UNO related charters and agreements advocating for inclusive education internationally. We start by looking at the universal declaration of education as a human right in 1948. The declaration advocates of education as a right for both individuals who are typical and those who have disabilities. We also review the Salamanca statement that equally advocated for the rights of education for children with Disabilities. We also briefly look at Individuals with Disabilities Education Act.

E-tivity 10.2.1

Numbering, pacing and sequencing	10.2.1
Title	Ratified International instruments in inclusive education in Kenya.
Purpose	The purpose of this e-tivity is to enable you explain international instruments advocating for inclusive education.
Brief summary of overall task	1.Open the link1 , Link 2 and Link 3 and use bullets to summarize the contents in the entire documents. 2.Now Listen to videos in the link below and write a bullet summary on the content. Video 1 , Video 2 Video 3
Spark	
Individual task	1.Write an essay on international law and policies guiding inclusive education. Explain the latest UNESCO monitoring report on inclusive education in the world.
Interaction begins	1. Discuss five Major international instruments enhancing inclusive education law. Post your response in the discussion forum online. 2. Now read responses from at least two other students and write a comment against their responses. Post your responses online
E-moderator interventions	• Ensure that learners are focused on the contents and context of discussion. • Stimulate further learning and generation of new ideas. • Provide feedback on the learning progress. • Round-up the e-tivity
Schedule and time	This task should take two hours
Next	Constitution of Kenya and education Law

10.2.2 Education Law and Inclusive Education

We do not have a law-making inclusive education compulsory but if all Kenyans have a right to essential values of human rights and equality, then it is indisputable that all Kenyans with disabilities are entitled to an equal compulsory and free education alongside their typical peers. This is the current world order. In addition to Kenyan domestic law, the Kenyan government has ratified many international treaties and declarations. Once international treaties are ratified, the state cannot enforce the new legislation until parliament enacts a relevant law. If discrepancies exist between the treaties and the domestic law, reservations are made within the instruments. Among the ratified instruments include: The Convention on the Rights of the Child (CRC) in 1989, the World Conference on Education for All (EFA) (1990), Convention on the Rights of Persons with Disabilities (CRPD) (2006), the Salamanca Statement (1994), the Dakar Framework for Action (2000), and the United Nations Summit on the Millennium Development Goals (MDGs) (2010). In this lesson we look at the relevant provisions of the constitution of Kenya Law on education of learners with exceptional needs.
