

**KENYATTA UNIVERSITY
EXAMINATION FOR THE DEGREE OF BACHELOR OF SCIENCE AND
BACHELOR OF EDUCATION**

SMA 102: BASIC MATHEMATICS

1ST SEMESTER 2021/2022

TIME: 2 Hours

INSTRUCTIONS: Attempt Question ONE and any other TWO.

Question One (30 Marks)

- a) Draw a Venn diagram representing $(A \cup B) - (A \cap B)$

SIR OTONDE MICHAEL AWITI

(2 marks)

- b) Give the truth table of the proposition give by $\sim (p \wedge q) \Leftrightarrow (\sim p) \vee (\sim q)$.

$$p \rightarrow q \quad q \rightarrow p \quad \neg p \rightarrow \neg q$$

(3 marks)

- c) State the converse, inverse and the contrapositive of

'if a triangle is equiangular, then it is equilateral'

(3 marks)

- d) If α and β are the roots of the quadratic equation $2x^2 - 4x - 3 = 0$, find the quadratic equation whose roots are $\frac{\alpha}{\beta}$ and $\frac{\beta}{\alpha}$.

$$\alpha + \beta = 2 \quad \alpha - \beta = -3/2 \quad \alpha + \beta = 2 \quad \alpha - \beta = -3/2 \quad \alpha + \beta = 2 \quad \alpha - \beta = -3/2$$

- e) Determine the line of symmetry and minimum or maximum point of the graph $f(x) = 2 - 2x - x^2$ without drawing the curve.

SIR OTONDE MICHAEL AWITI

(4 marks)

- f) When the polynomial $f(x) = x^3 + 2x^2 - 5ax - 7$ is divided by $x + 1$, the remainder is R_1 . When the polynomial $h(x) = x^3 + ax^2 - 12x + 6$ is divided by $x - 2$, the remainder is R_2 . If $2R_1 + R_2 = 6$, find the value of a .

$$R_2 = 6 - 2R_1 \quad \text{at } x = -1 \quad P = 6 - 2R_1$$

$$\frac{3}{2} \quad \frac{7}{2} \quad 3 \text{ rem } 4 \quad 7 = 2(3) + 1$$

- g) Solve $z^2 + 1 = 0$

(4 marks)

SIR OTONDE MICHAEL AWITI

- h) Find $\text{Re}(z)$ and $\text{Im}(z)$ given that $z = \frac{2-i\sqrt{3}}{i+\sqrt{3}}$

(3 marks)

- i) Prove that $\sqrt{6}$ is an irrational number.

SIR OTONDE MICHAEL AWITI (4 marks)

Question Two (20 Marks)

- a) The function $f(x) = x^3 - 4x^2 + ax + b$ is such that it is divisible by $x - 3$ and when divided by $x - 1$, there is a remainder of 4. Find the values of a and b .

$$\begin{aligned} 8 \div 2 &= 4 \text{ rem } 0 \\ 8 \div 2 &= 2 \text{ rem } 2 \end{aligned} \quad \begin{aligned} 2 \times 2 &= 4 \\ (2 \times 2) \times 2 &= 8 \end{aligned} \quad (4 \text{ marks})$$

- b) The roots of the quadratic equation $2x^2 + 7x - 3 = 0$ are α and β . Find the quadratic equation whose roots are $\alpha + \frac{5}{\beta}$ and $\beta + \frac{5}{\alpha}$.

$$\begin{aligned} \alpha + \beta + 3 + \frac{5}{\beta} \\ \alpha + \beta + 3 + \frac{5}{\beta} \\ \alpha + \beta + 3 + \frac{5}{\beta} \end{aligned} \quad \begin{aligned} \alpha + \beta &= -\frac{7}{2} \\ \alpha\beta &= -\frac{3}{2} \end{aligned} \quad \begin{aligned} \alpha + \beta + 3 + \frac{5}{\beta} \\ \alpha + \beta + 3 + \frac{5}{\beta} \\ \alpha + \beta + 3 + \frac{5}{\beta} \end{aligned} \quad (5 \text{ marks})$$

- c) In a class of 100 students, 35 like geography, 45 like History and 10 like both. How many like either of them and how many like neither?

$$G \cup H \quad (G \cup H)^c \quad (3 \text{ marks})$$

- d) Find the set of all values of x such that $12x^2 < x + 6$.

$$12x^2 < x + 6 \quad (4 \text{ marks})$$

- e) Simplify $(A^c \cap B) \cup (A^c \cap B^c) \cup (A \cap B)$

$$(A^c \cap B) \cup (A^c \cap B^c) \cup (A \cap B) \quad (4 \text{ marks})$$

Question Three (20 Marks)

- a) Solve the equation $x^3 - 2x^2 - 4x + 8 = 0$.

SIR OTONDE MICHAEL AWITI (4 marks)

- b) I have nine paintings and have room to display only four of them at a time on my wall. How many different ways could I do this?

(2 marks)

- c) Find the coefficient of x^5 in the expansion of $(4y - 3x)^{15}$

(3 marks)

- d) There are 16 boys and 12 girls in a class. How many ways can a committee of 4 people be formed if there must be at least 2 girls on the committee?

SIR OTONDE MICHAEL AWITI

(4 marks)

- e) Use the binomial theorem to expand $(8 - 3x)^{\frac{1}{2}}$ in ascending powers of x up to the term in x^3 . Use your expansion, with suitable value of x , to obtain an approximation to $\sqrt[3]{7.7}$ correct to 3 decimal places.

INVOLVEMENT IN EXAMINATION IRREGULARITY SHALL LEAD TO DISCONTINUATION

SIR OTONDE MICHAEL AWITI

(5 marks)

- f) Find the number of arrangements of the letters of the word PARRAMATTA.

(2 marks)

Question Four (20 Marks)

- a) Use Boolean algebra to simplify the following.

i) $(p \wedge q) \vee (\sim p \wedge q) \vee (p \wedge \sim q)$

(3 marks)

ii) $\sim(p \Rightarrow q) \vee p$

SIR OTONDE MICHAEL AWITI

(4 marks)

- b) Show whether $(p \Rightarrow q) \wedge \sim q \Rightarrow \sim p$ is a tautology, a contradiction or neither.

(3 marks)

- c) (a) Find the contrapositive of the converse of $p \Rightarrow \sim q$.

(2 marks)

- (b) Write the negation of $\sim p \wedge \sim q$ in its simplest form.

(2 marks)

- d) Translate the following argument into symbolic form and using truth table, determine the validity of the argument;

If rains do not come, or no one works then the crops will fail.
The crops have failed.
Therefore, the rains did not come.

SIR OTONDE MICHAEL AWITI

(6 marks)

Question Five (20 Marks)

- a) By giving a counter example, disapprove, the statement

$$\forall x \in \mathbb{R}, (x^2 > 0).$$

(2 marks)

- b) Prove by induction that

$$2 + 4 + 6 + \dots + 2n = n(n + 1).$$

(4 marks)

- c) (a) Express the complex number $\frac{1+2i}{-4+3i}$ in the form $a + bi$, where $a, b \in \mathbb{R}$.

(2 marks)

(b) Express the complex number $z = -5 + 5i$ in polar form

(3 marks)

d) (a) By using De Moivre's theorem, express $(1 + i)^{10}$ in the form $a + bi$, where $a, b \in \mathbb{R}$.

(4 marks)

(b) Find the square roots of i .

(5 marks)
