

EMP 211 PAST PAPERS WITH ANSWERS

BY SIR OTONDE MICHAEL AWITI 0741050074

Question One

a) Differentiate between Education and Curriculum.

- **Education:** A broad process of learning through which knowledge, skills, attitudes, and values are acquired. It occurs both formally (in schools) and informally (at home or in the community).
- **Curriculum:** A structured set of courses, objectives, and content designed to guide teaching and learning in an educational institution. It is a subset of education that provides a framework for what is taught.

b) Give a brief description of the three dimensions of school curriculum.

1. **Intended Curriculum:** The officially prescribed objectives, content, and learning experiences outlined by education authorities.
 - Example: The Kenyan Competency-Based Curriculum (CBC).
2. **Implemented Curriculum:** The curriculum as delivered by teachers in classrooms. It may differ slightly from the intended curriculum due to teachers' interpretations.
 - Example: A teacher emphasizing project-based learning in CBC.
3. **Attained Curriculum:** The outcomes or competencies students actually achieve.
 - Example: Students' ability to apply critical thinking skills after completing CBC activities.

c) List six functions of Education to an individual.

1. **Imparting Knowledge:** Helps individuals acquire essential knowledge in various subjects.
2. **Skill Development:** Prepares learners for employment by teaching practical skills.
3. **Character Building:** Develops values, morals, and ethics in individuals.
4. **Socialization:** Integrates individuals into society by teaching norms and customs.
5. **Fostering Creativity:** Encourages innovation and problem-solving abilities.
6. **Career Advancement:** Provides qualifications that enable individuals to access better job opportunities.

d) Briefly describe three sources of curriculum objectives.

1. **Philosophical Foundations:** Curriculum objectives are derived from educational philosophies like progressivism or essentialism.
 - Example: CBC emphasizes learner-centered approaches rooted in progressivism.
2. **Societal Needs:** The curriculum addresses the cultural, economic, and political requirements of society.

- Example: Emphasizing entrepreneurship skills to address unemployment in Kenya.
- 3. **Learners' Needs:** Focuses on developmental stages, interests, and abilities of students.
 - Example: CBC tailoring content to students' competencies and age-appropriate activities.

e) Discuss expository and heuristic approaches to curriculum implementation.

- **Expository Approach:** A teacher-centered method where information is presented directly to learners. It emphasizes structured learning and clarity.
 - Example: A teacher explaining mathematical concepts step-by-step.
- **Heuristic Approach:** A learner-centered method that encourages discovery and problem-solving. It involves students actively exploring and learning independently.
 - Example: Students conducting experiments in science to discover principles.

Question Two

a) Give a brief description of five competencies targeted by the Competency-Based Curriculum (CBC).

1. **Communication and Collaboration:** Enhancing learners' ability to express ideas effectively and work in teams.
2. **Critical Thinking and Problem-Solving:** Equipping students to analyze issues and develop solutions.
3. **Imagination and Creativity:** Encouraging innovative thinking and artistic expression.
4. **Digital Literacy:** Building skills in using technology for learning and problem-solving.
5. **Learning to Learn:** Promoting lifelong learning habits and adaptability.

b) Explain five challenges that hinder curriculum innovation.

1. **Inadequate Funding:** Insufficient financial resources for training and materials limit innovation.
2. **Resistance to Change:** Teachers and stakeholders may resist adopting new methods.
3. **Limited Infrastructure:** Poor facilities like classrooms and ICT tools hinder implementation.
4. **Lack of Training:** Teachers may lack the skills to implement innovative curricula.
5. **Cultural Barriers:** Traditional beliefs and practices may conflict with modern approaches.

Question Three

a) Describe the criteria of determining the worth of Curriculum-Based Curriculum.

1. **Relevance:** The curriculum must address current societal and learners' needs.
 - Example: CBC includes ICT to meet technological demands.
2. **Effectiveness:** Measured by the competencies learners achieve.
 - Example: Improved problem-solving skills in CBC graduates.
3. **Efficiency:** Resources must be utilized effectively to achieve objectives.
 - Example: Availability of textbooks and teacher training.
4. **Equity:** The curriculum should ensure inclusivity for all learners.
 - Example: Provision for students with disabilities under CBC.
5. **Sustainability:** Long-term implementation should be feasible.

b) Discuss five steps followed in the Research, Development, and Diffusion Model of Curriculum Innovation.

1. **Needs Assessment:** Identifying gaps in the current curriculum.
2. **Development:** Creating objectives, content, and materials to address identified needs.
3. **Pilot Testing:** Implementing the curriculum in select schools to evaluate its effectiveness.
4. **Revision:** Adjusting the curriculum based on feedback from pilot testing.
5. **Implementation and Diffusion:** Rolling out the curriculum nationally and monitoring its adoption.

Question Four

Discuss the following curriculum innovations as applied in the Kenya School system:

i) Curriculum Resource Centers

- These centers provide access to teaching and learning materials, as well as training for educators.
 - Example: KICD resource centers in Kenya distribute CBC materials and support teacher training.

ii) Social Education and Ethics

- This subject promotes moral values, responsible citizenship, and social harmony.
 - Example: Lessons on environmental conservation instill responsibility in Kenyan learners.

Question Five

Discuss the role of KICD in curriculum innovation process.

1. **Curriculum Design:** Develops and updates curricula to meet national goals.
2. **Training Teachers:** Provides professional development to prepare teachers for new curricula.
3. **Resource Development:** Produces textbooks, guides, and digital resources for implementation.

4. **Monitoring and Evaluation:** Assesses the impact of the curriculum and recommends adjustments.
 5. **Stakeholder Engagement:** Collaborates with parents, schools, and policymakers to ensure inclusivity and relevance.
-

Question One

(a) The competency-based curriculum that is currently being implemented in Kenya is meant to provide the learner with the 21st-century skills due to the following reasons except one:

- A) To enhance students' computer literacy skills
- B) To encourage learners to understand the functioning of their counties and homes
- C) To develop students' analytical thinking capacities
- D) To encourage learners to develop an understanding of science and technology and how their uses benefit society

Answer:

The correct answer is **B**: To encourage learners to understand the functioning of their counties and homes.

Reason: CBC emphasizes digital literacy, analytical thinking, and science/technology but does not focus specifically on understanding counties and homes.

(b) Differentiate between education and schooling.

- **Education:** A lifelong process of acquiring knowledge, skills, values, and attitudes, whether formal, informal, or non-formal.
 - **Schooling:** A formal subset of education that occurs in structured institutions such as schools, with a set curriculum and assessments.
-

(c) Give any three advantages of writing objectives.

1. **Clarity of Purpose:** Objectives guide educators and learners on the intended outcomes of the lesson or curriculum.
 2. **Assessment Tool:** Well-defined objectives help in measuring whether learning goals have been achieved.
 3. **Resource Planning:** Objectives assist teachers in selecting appropriate teaching methods and resources.
-

(d) Differentiate between intended and achieved curriculum.

- **Intended Curriculum:** The official plan or framework outlining what should be taught, as developed by curriculum designers or education authorities.

- Example: CBC emphasizes competencies like creativity and critical thinking.
 - **Achieved Curriculum:** The actual learning outcomes demonstrated by students after the curriculum has been implemented.
 - Example: Students mastering teamwork through CBC group projects.
-

(e) State any three functions of society in curriculum development.

1. **Identifying Needs:** Society highlights the skills and knowledge learners need to contribute effectively to the community.
 2. **Cultural Transmission:** Ensures that the curriculum preserves and passes on cultural values, traditions, and norms.
 3. **Workforce Preparation:** Society demands curricula that prepare learners for employment and entrepreneurship.
-

(f) State two contributions of historical foundation to curriculum theory and practice.

1. **Learning from Past Practices:** Historical insights help refine and avoid repeating mistakes in curriculum design.
 - Example: Kenya's shift to CBC from the 8-4-4 system is informed by past challenges.
 2. **Preserving Educational Philosophies:** Historical influences like Dewey's progressivism shape learner-centered approaches in modern curricula.
-

(g) Differentiate between objectives-based curriculum and competency-based curriculum (CBC).

- **Objectives-Based Curriculum:** Focuses on predefined goals or objectives that students are expected to achieve by the end of a learning period. It emphasizes knowledge acquisition and rote learning.
 - **Competency-Based Curriculum (CBC):** Focuses on developing practical competencies, skills, and attitudes for real-world application. It emphasizes problem-solving, critical thinking, and creativity.
-

(h) State 3 characteristics of R, D & D innovation.

1. **Systematic Approach:** Research, Development, and Diffusion (R, D & D) innovation involves a structured process, ensuring that the innovation undergoes thorough investigation, testing, and refinement before implementation.
2. **Iterative Process:** R, D & D encourages continuous improvement through multiple testing cycles and revisions to achieve effectiveness.
3. **Focus on Dissemination:** The final stage of R, D & D innovation is diffusion, where the innovation is shared widely to ensure adoption and impact.

(i) State two roles of the Directorate of Quality Assurance and Standards in curriculum implementation.

1. **Monitoring and Evaluation:** The directorate ensures that teaching practices align with the curriculum's objectives and standards.
 2. **Capacity Building:** It trains teachers and stakeholders to effectively implement curriculum changes and adopt innovative methods.
-

(j) Explain three ways for judging the value of an innovation.

1. **Relevance to Needs:** Assess if the innovation addresses specific challenges or needs within the educational system or target group.
 2. **Effectiveness:** Evaluate whether the innovation produces measurable improvements in learning outcomes or processes.
 3. **Sustainability:** Determine if the innovation can be maintained and scaled over time with available resources.
-

(k) State two reasons why a curriculum should be tried before implementation.

1. **Identify Challenges:** Piloting helps uncover practical issues that might hinder full implementation.
 2. **Refine Content:** Testing ensures the curriculum content and teaching strategies are appropriate and effective.
-

(l) Differentiate between the following modes of assessment:

(i) Assessment of learning and assessment for learning.

- **Assessment of Learning:** Summative assessments that evaluate students' performance at the end of a learning period (e.g., final exams).
- **Assessment for Learning:** Formative assessments used to provide feedback during the learning process to improve teaching and learning outcomes.

(ii) Criterion-referenced assessment and norm-referenced assessment.

- **Criterion-Referenced Assessment:** Measures students' performance against predefined objectives or criteria.
 - Example: Passing a test by meeting specific scores.
- **Norm-Referenced Assessment:** Compares a student's performance to that of peers.
 - Example: Ranking students in percentile scores.

Section B

Question Two: Discuss five implications of psychological foundations on the school curriculum in Kenya.

1. **Child-Centered Learning:** Psychologists like Piaget and Vygotsky emphasize tailoring the curriculum to match the cognitive and developmental stages of learners.
 2. **Motivation and Engagement:** Psychological principles highlight the importance of fostering intrinsic motivation through interactive and relatable content.
 3. **Differentiated Instruction:** The curriculum incorporates various teaching strategies to address diverse learning needs, as informed by Howard Gardner's theory of multiple intelligences.
 4. **Learning Theories:** Behaviorism, constructivism, and experiential learning theories guide the design of instructional methods and assessment strategies.
 5. **Focus on Emotional Development:** Schools integrate psychosocial support and emotional intelligence lessons into the curriculum to promote holistic development.
-

Question Three

(a) Explain three characteristics of the learner-centered curriculum design.

1. **Emphasis on Individual Needs:** Focuses on catering to the unique interests, abilities, and learning styles of each student.
2. **Active Learning:** Encourages students to take ownership of their learning through participation in discussions, projects, and problem-solving activities.
3. **Flexibility:** Adaptable to allow learners to explore their interests while meeting the broader goals of the curriculum.

(b) Discuss three major activities carried out by curriculum planners when designing the curriculum.

1. **Needs Assessment:** Identifying societal, educational, and economic needs that the curriculum aims to address.
 2. **Content Selection:** Choosing appropriate topics, skills, and values to include, ensuring relevance and balance.
 3. **Evaluation Criteria Design:** Developing tools and methods to assess the effectiveness of the curriculum in achieving its goals.
-

Question Four: Examine the role of professionals in curriculum development, implementation, and evaluation.

1. **Teachers:** Provide practical insights into the feasibility of proposed content and methods based on classroom experience.
2. **Educational Researchers:** Conduct studies to identify effective strategies and evaluate curriculum outcomes.

3. **Policy Makers:** Set the goals and standards to ensure alignment with national educational objectives.
 4. **Curriculum Designers:** Develop frameworks, teaching materials, and guidelines based on evidence and stakeholder input.
 5. **Assessment Experts:** Create evaluation tools to measure the curriculum's success and suggest improvements.
-

Question Five

(a) Explain five roles of formative evaluation.

1. **Providing Feedback:** Offers immediate input to improve teaching methods and learning processes.
2. **Identifying Weaknesses:** Highlights areas where students struggle, allowing for timely intervention.
3. **Promoting Engagement:** Encourages active participation through regular assessments and feedback.
4. **Supporting Differentiation:** Helps teachers tailor instruction to meet individual learner needs.
5. **Enhancing Learning Outcomes:** Guides adjustments in teaching approaches to optimize student achievement.

(b) Discuss five principles of instructional evaluation.

1. **Reliability:** Ensures consistent results across different contexts and times.
 2. **Validity:** Measures what it is intended to assess, ensuring relevance to learning objectives.
 3. **Fairness:** Avoids bias, providing equal opportunities for all learners.
 4. **Practicality:** Easy to administer within the available resources and constraints.
 5. **Feedback-Oriented:** Provides actionable insights to both teachers and students for improvement.
-

A TRUE REPRESENTATION

SECTION A: SHORT ANSWER QUESTIONS (30 MARKS)

Question One

(a) Define the following concepts: (2 Marks)

(i) Education

Education is the process of facilitating learning, or the acquisition of knowledge, skills, values, morals, beliefs, and habits, typically delivered through teaching, training, or research. For example, formal education takes place in schools and universities.

(ii) Curriculum

Curriculum refers to the planned set of lessons, activities, and objectives designed to achieve specific learning outcomes. For instance, Kenya's Competency-Based Curriculum (CBC) focuses on skills and knowledge applicable to real-life situations.

(b) Identify any TWO foundations of curriculum. (2 Marks)

1. **Philosophical Foundation:** Determines the aims, values, and purposes of education. For example, idealism emphasizes intellectual development.
 2. **Psychological Foundation:** Focuses on understanding how learners acquire knowledge, such as using Piaget's theory of cognitive development.
-

(c) Identify any TWO patterns of curriculum design. (2 Marks)

1. **Subject-Centered Design:** Organized around specific subjects like mathematics, science, or literature.
 2. **Learner-Centered Design:** Focused on the needs and interests of learners, promoting engagement and critical thinking.
-

(d) Explain any THREE challenges in the curriculum development process in Kenya. (6 Marks)

1. **Inadequate Funding:** Limited resources hinder the development and implementation of quality curricula.
 2. **Teacher Preparedness:** Teachers often lack sufficient training to adapt to new curricula, such as CBC.
 3. **Cultural Diversity:** Balancing inclusivity and relevance for diverse ethnic and linguistic groups is challenging.
-

(e) Differentiate between assessment for learning and assessment of learning. (4 Marks)

- **Assessment for Learning:** Continuous and formative, designed to provide feedback to improve learning, such as quizzes or classroom observations.
 - **Assessment of Learning:** Summative and evaluates learning outcomes, such as end-of-term exams.
-

(f) Identify any FOUR innovation models. (4 Marks)

1. **Disruptive Innovation Model:** Introduces groundbreaking changes, like integrating AI in education.
2. **Sustaining Innovation Model:** Enhances existing systems incrementally, such as updating textbooks.
3. **Open Innovation Model:** Encourages collaboration across sectors to create new ideas, such as partnerships between schools and tech firms.

4. **Modular Innovation Model:** Focuses on improving specific components, like online learning platforms.
-

(g) Outline any FOUR recent curriculum innovations in Kenya. (8 Marks)

1. **Competency-Based Curriculum (CBC):** Introduced to focus on skills and competencies rather than rote learning.
 2. **Integration of ICT:** Digital tools and e-learning incorporated into classrooms.
 3. **Environmental Education:** Emphasizing sustainability and conservation in learning materials.
 4. **Inclusivity in Education:** Enhanced focus on special needs education and marginalized communities.
-

SECTION B (30 MARKS)

Question Two

(a) Identify THREE elements and FOUR dimensions of school curriculum in Kenya. (7 Marks)

Three Elements:

1. **Content:** The knowledge, skills, and attitudes to be delivered.
2. **Learning Activities:** The methodologies used, such as group discussions or hands-on experiments.
3. **Assessment:** Tools to evaluate learners' progress, like exams or projects.

Four Dimensions:

1. **Cultural Dimension:** Reflecting diverse ethnic and linguistic heritages.
 2. **Social Dimension:** Addressing societal needs and values, such as civic responsibility.
 3. **Economic Dimension:** Preparing learners for the job market through technical and vocational training.
 4. **Technological Dimension:** Integrating digital tools and ICT in education.
-

(b) Briefly explain FOUR historical events that have influenced school curriculum in Kenya. (8 Marks)

1. **Missionary Education (Early 1900s):** Focused on religious instruction, laying the foundation for formal education in Kenya.
2. **The Ominde Report (1964):** Advocated for a unified curriculum promoting national identity post-independence.
3. **The Mackay Report (1981):** Led to the introduction of the 8-4-4 system, emphasizing practical skills.

4. **Introduction of CBC (2017):** Marked a shift from knowledge-based to competency-based education, focusing on practical application.
-
-

Question Three

(a) Explain the steps in Taba's model of curriculum design. (8 Marks)

Taba's model of curriculum design is inductive, emphasizing teacher input and practical application. The steps include:

1. **Diagnosis of Needs:** Identifying the learning needs of students and community goals. For example, addressing literacy challenges in rural areas.
 2. **Formulation of Objectives:** Defining clear, achievable learning objectives based on the needs diagnosed.
 3. **Selection of Content:** Choosing relevant topics and materials to achieve the objectives, such as integrating environmental conservation.
 4. **Organization of Content:** Structuring the content logically and sequentially to enhance understanding, like arranging topics from basic to complex.
 5. **Selection of Learning Experiences:** Designing activities that actively engage learners, such as role-playing or group discussions.
 6. **Organization of Learning Experiences:** Arranging activities in a way that ensures progression and integration, such as linking theory with practice.
 7. **Evaluation and Adjustment:** Assessing the effectiveness of the curriculum and making necessary changes based on feedback and outcomes.
-

(b) Outline the challenges in the curriculum development process. (7 Marks)

1. **Limited Resources:** Lack of funding and materials, especially in rural schools.
 2. **Teacher Involvement:** Insufficient engagement of teachers in the development process leads to resistance in implementation.
 3. **Cultural Sensitivity:** Balancing diverse cultural and linguistic needs can complicate curriculum development.
 4. **Policy Constraints:** Bureaucratic delays in approval and implementation hinder progress.
 5. **Technological Adaptation:** Integrating ICT into curricula requires infrastructure and training that may not be available.
 6. **Political Interference:** Frequent changes in policies due to political shifts disrupt consistency.
 7. **Stakeholder Coordination:** Poor communication and collaboration among stakeholders lead to fragmented efforts.
-

Question Four

(a) Identify any FIVE agencies involved in the curriculum development process. (5 Marks)

1. **Kenya Institute of Curriculum Development (KICD):** Designs and approves curricula.
 2. **Ministry of Education (MoE):** Oversees policy formulation and implementation.
 3. **Teachers Service Commission (TSC):** Manages teacher deployment and training.
 4. **Non-Governmental Organizations (NGOs):** Provide support and funding, especially in marginalized areas.
 5. **Parents and Guardians:** Offer insights into students' needs and expectations.
-

(b) Explain the strategies of curriculum implementation. (10 Marks)

1. **Teacher Training:** Providing in-service training to equip teachers with skills for new curricula, such as CBC workshops.
 2. **Resource Provision:** Supplying textbooks, digital tools, and teaching aids.
 3. **Community Involvement:** Engaging parents and local leaders to support learning initiatives.
 4. **Monitoring and Evaluation:** Regular assessment of progress to identify and address challenges.
 5. **Use of ICT:** Leveraging technology to enhance teaching and learning.
 6. **Pilot Programs:** Testing the curriculum in selected schools before nationwide rollout.
 7. **Collaboration:** Encouraging cooperation among stakeholders, including private sector partnerships.
 8. **Policy Support:** Ensuring government policies align with the curriculum goals.
-

Question Five

(a) Outline the principles of instructional evaluation. (10 Marks)

1. **Validity:** Ensuring the evaluation measures what it is intended to assess. For example, testing comprehension rather than memorization.
2. **Reliability:** Consistent results when the evaluation is repeated under similar conditions.
3. **Fairness:** Avoiding bias and ensuring inclusivity for all learners, including those with disabilities.
4. **Practicality:** Ensuring the evaluation method is cost-effective and manageable.
5. **Formative and Summative Balance:** Combining ongoing assessments with final evaluations.
6. **Flexibility:** Allowing adaptability to different learning environments and needs.
7. **Student-Centered:** Focusing on learners' progress and feedback for improvement.
8. **Alignment:** Ensuring evaluation aligns with learning objectives and teaching methods.

(b) Identify any FIVE challenges to curriculum innovation in Kenya. (5 Marks)

1. **Resistance to Change:** Teachers and stakeholders often prefer traditional methods.
 2. **Inadequate Training:** Lack of professional development opportunities for educators.
 3. **Limited Infrastructure:** Insufficient classrooms, ICT tools, and materials.
 4. **Cost Implications:** High financial burden for implementing innovations.
 5. **Policy Inconsistencies:** Frequent changes in educational policies disrupt innovation continuity.
-

Section A. Short answer questions (30 marks)

(a) State TWO characteristics of indigenous African education. (2 Marks)

1. **Practical and Functional:** Indigenous African education focused on equipping individuals with practical skills, such as farming, hunting, and craftsmanship, to meet the needs of their community.
 2. **Community-Centered:** Education was rooted in social life and cultural practices, emphasizing moral values, traditions, and collective responsibility.
-

(b) Describe three criteria for judging the value of curriculum innovation. (3 Marks)

1. **Relevance:** The curriculum must address the needs of learners and society, such as preparing students for contemporary challenges like technology and climate change.
 2. **Feasibility:** Innovation must be practical, considering available resources, teacher readiness, and infrastructure.
 3. **Effectiveness:** The curriculum should lead to measurable improvements in student performance and skill development.
-

(c) Highlight three differences between the 8-4-4 and the Competency-Based Curriculum. (3 Marks)

1. **Focus:** The 8-4-4 system emphasized content mastery, while the CBC focuses on developing skills, values, and competencies.
 2. **Assessment:** 8-4-4 relied heavily on summative exams, whereas CBC emphasizes formative assessments and portfolios.
 3. **Structure:** CBC is flexible, allowing learners to progress based on their abilities, unlike the rigid grade-level structure of the 8-4-4 system.
-

(d) Distinguish between "assessment of learning" and "assessment for learning." (4 Marks)

1. **Assessment of Learning:** Summative in nature, it evaluates the learner's performance after instruction to measure achievement, e.g., final exams.
 2. **Assessment for Learning:** Formative in nature, it is conducted during instruction to provide feedback and improve learning, e.g., class quizzes.
-

(e) Justify the use of learner-centered curriculum designs in competency-based curriculum. (3 Marks)

Learner-centered designs prioritize individual needs, interests, and abilities, promoting active participation and critical thinking. In CBC, this approach enhances creativity, teamwork, and real-world application of knowledge, aligning education with life skills and industry demands.

(f) Explain why it would be wrong to embark on teaching without instruction objectives. (3 Marks)

Instructional objectives provide clear goals, guiding both teachers and learners on what to achieve. Without them, lessons lack focus, making it difficult to evaluate progress or measure success effectively.

(g) Explain THREE criteria used to select curriculum content. (3 Marks)

1. **Significance:** Content should contribute to the learner's intellectual, social, and moral development.
 2. **Learnability:** The material must be age-appropriate and match the learners' capabilities.
 3. **Utility:** Content should have practical value and applicability in real-life situations.
-

(h) Differentiate between pre-service and in-service teacher education. (2 Marks)

1. **Pre-Service Education:** Training provided to individuals before they join the teaching profession, e.g., undergraduate teacher training programs.
 2. **In-Service Education:** Professional development opportunities for practicing teachers to enhance their skills and knowledge.
-

(i) Differentiate between core and correlated subject designs. (3 Marks)

1. **Core Subject Design:** Focuses on essential subjects like mathematics and language, forming the foundation of education.
2. **Correlated Subject Design:** Links related subjects, such as integrating history and geography to provide a holistic understanding of social studies.

(j) Explain any TWO teacher education issues in Kenya. (4 Marks)

1. **Inadequate Training:** Many teachers lack the skills to effectively implement CBC, leading to resistance and poor delivery.
 2. **Resource Constraints:** Limited access to teaching materials and overcrowded classrooms hinder quality education.
-

Section B. Essay questions (30 marks)

(a) Identify any five agencies involved in curriculum development and implementation. (5 Marks)

1. **Kenya Institute of Curriculum Development (KICD):** Develops and approves curricula.
 2. **Ministry of Education (MoE):** Oversees policy formulation and enforcement.
 3. **Teachers Service Commission (TSC):** Recruits and trains teachers to deliver the curriculum.
 4. **Non-Governmental Organizations (NGOs):** Provide financial and technical support.
 5. **Parent-Teacher Associations (PTAs):** Ensure local input and implementation of school-based initiatives.
-

(b) Discuss how secondary school curriculum in Kenya attempts to provide holistic education. (10 Marks)

The Kenyan secondary school curriculum emphasizes holistic education by:

1. **Incorporating Life Skills:** Subjects like CRE and social studies instill moral values and critical thinking.
2. **Promoting Extracurricular Activities:** Sports, drama, and music clubs enhance creativity and teamwork.
3. **Fostering Practical Learning:** Vocational courses like agriculture and business studies equip learners with hands-on skills.
4. **Encouraging Innovation:** ICT integration prepares students for the digital era.
5. **Addressing Emotional Well-Being:** Guidance and counseling programs support mental health and personal growth.

Holistic education ensures learners are well-rounded, socially responsible, and prepared for future challenges.

Discuss the role of the teacher in the implementation of the Competency-Based Curriculum (CBC). (10 marks)

Teachers play a critical role in the implementation of the CBC, including:

1. **Facilitators of Learning:** Teachers guide learners in acquiring competencies through hands-on activities, group work, and discussions.
2. **Curriculum Developers:** They adapt learning materials to suit students' needs while ensuring alignment with CBC objectives.
3. **Assessors:** Teachers use formative and summative assessments to evaluate students' skills and competencies rather than just theoretical knowledge.
4. **Mentors:** Teachers mentor learners, fostering creativity, critical thinking, and problem-solving skills.
5. **Collaborators:** Teachers work with parents and other stakeholders to support students' holistic development.

For example, in a CBC science lesson, a teacher might guide learners to conduct experiments, encouraging problem-solving and innovation.

Explain FIVE challenges teachers face in the implementation of the Competency-Based Curriculum in Kenya. (5 marks)

1. **Inadequate Training:** Many teachers lack the necessary skills to deliver CBC effectively.
2. **Large Class Sizes:** Managing large groups makes it challenging to focus on individual learners' needs.
3. **Insufficient Resources:** Schools often lack materials like textbooks and tools for practical activities.
4. **Resistance to Change:** Some teachers are reluctant to move away from traditional teaching methods.
5. **High Workload:** CBC demands more lesson preparation and frequent assessments, increasing teachers' workload.

For instance, a teacher without adequate training may struggle to implement learner-centered activities effectively.

Explain FIVE purposes of curriculum evaluation. (5 marks)

1. **Measure Effectiveness:** To assess whether the curriculum achieves its intended goals.
2. **Identify Strengths and Weaknesses:** To pinpoint areas that need improvement.
3. **Ensure Relevance:** To determine if the curriculum meets the needs of society and learners.
4. **Support Decision-Making:** Provides data to guide curriculum revisions and policy-making.
5. **Accountability:** Ensures educators and institutions meet set standards and expectations.

For example, curriculum evaluation might reveal gaps in practical skill development, leading to its revision.

Discuss the backward curriculum design model as applied in Competency-Based Education and Training. (10 marks)

The backward curriculum design model involves planning educational programs by starting with the desired outcomes and working backward. In CBC:

1. **Identify Desired Competencies:** Define the skills and knowledge learners should acquire.
2. **Determine Assessments:** Plan how to evaluate learners' attainment of these competencies.
3. **Design Learning Experiences:** Develop activities and lessons that support achieving the competencies.

For example, if the goal is to teach problem-solving, teachers may design assessments requiring students to solve real-world issues and plan lessons that teach analytical techniques.

State any THREE approaches to the curriculum process. (3 marks)

1. **Subject-Centered Approach:** Focuses on traditional subjects, with knowledge organized by disciplines.
 2. **Learner-Centered Approach:** Prioritizes the needs, interests, and experiences of learners.
 3. **Problem-Centered Approach:** Addresses real-life problems, encouraging critical thinking and application of knowledge.
-

Describe FOUR historical influences showing how they have influenced the school curriculum in Kenya. (12 marks)

1. **Colonial Legacy:** The colonial education system introduced subjects like English and vocational training, which still influence Kenya's curriculum today.
2. **Religious Influence:** Missionaries emphasized literacy and religious studies, shaping moral education in schools.
3. **Globalization:** Integration of ICT and international standards reflects global trends.
4. **Post-Independence Reforms:** Policies like the 8-4-4 system and CBC emerged to address societal needs, including industrialization and innovation.

For example, the introduction of CBC reflects global trends emphasizing skills and competencies over rote learning.

(a) State TWO characteristics of the Competency-Based Curriculum. (2 marks)

1. **Learner-Centered Approach:** CBC emphasizes active participation by learners, encouraging creativity and innovation.
2. **Focus on Competencies:** It prioritizes the acquisition of skills, attitudes, and values over rote learning.

For example, in a CBC classroom, students may be tasked with a project that develops teamwork and problem-solving skills.

(b) Differentiate between an objective and a learning outcome. (2 marks)

- **Objective:** A statement describing what the teacher intends to achieve during the lesson.
- **Learning Outcome:** A measurable achievement showing what learners have gained after instruction.

For example, an objective might state, "Introduce the concept of fractions," while a learning outcome would be, "Learners will solve problems involving fractions."

(c) Describe THREE ways through which Competency-Based Curriculum has promoted the teaching of values. (3 marks)

1. **Integration into Subjects:** Values like honesty are taught through activities in subjects like social studies.
 2. **Community Service:** Learners engage in activities that promote empathy and social responsibility.
 3. **Collaborative Learning:** Group tasks teach respect, teamwork, and cooperation.
-

(d) Write THREE activities at the curriculum planning stage of the curriculum development process. (3 marks)

1. **Needs Assessment:** Identifying gaps in the current curriculum.
2. **Setting Objectives:** Determining the goals of the curriculum.
3. **Resource Identification:** Allocating materials and infrastructure to support the curriculum.

For instance, planning for a science curriculum might involve procuring lab equipment.

(e) State THREE activities in curriculum maintenance. (3 marks)

1. **Monitoring and Evaluation:** Regular assessment of curriculum effectiveness.
2. **Updating Content:** Incorporating new knowledge and trends.
3. **Training Teachers:** Providing continuous professional development for educators.

(f) State TWO functions of assessment of learning in the Competency-Based Curriculum. (2 marks)

1. **Measure Competency Acquisition:** Determines if learners have achieved desired skills.
 2. **Feedback Mechanism:** Guides both teachers and learners on areas needing improvement.
-

(g) Distinguish between curriculum development process and curriculum design. (2 marks)

- **Curriculum Development Process:** The entire cycle of creating, implementing, and evaluating a curriculum.
- **Curriculum Design:** The specific framework or structure used to organize the curriculum.

For example, a spiral design revisits topics progressively, while linear design covers them sequentially.

(h) Explain THREE ways for judging the value of an innovation. (3 marks)

1. **Relevance:** How well the innovation addresses existing needs or gaps.
 2. **Effectiveness:** The extent to which the innovation achieves desired outcomes.
 3. **Sustainability:** Its ability to remain functional and beneficial over time.
-

(i) Justify the inclusion of the core competencies in the Competency-Based Curriculum. (3 marks)

1. **Holistic Development:** Core competencies such as critical thinking prepare learners for real-life challenges.
 2. **Global Competitiveness:** Equips learners with skills to thrive in the global job market.
 3. **Innovation and Creativity:** Encourages problem-solving and entrepreneurial skills.
-

(j) Justify the use of learner-centered curriculum designs in the Competency-Based Curriculum. (4 marks)

1. **Active Participation:** Learners take ownership of their education through interactive methods.

2. **Differentiated Learning:** Meets the needs of diverse learners by accommodating different abilities.
3. **Skill Development:** Focuses on practical application of knowledge.
4. **Enhanced Motivation:** Engages learners by connecting lessons to their interests and goals.

For example, a CBC teacher might use project-based learning to allow students to explore their interests while achieving curriculum goals.

(k) Explain THREE roles of the Kenya National Examinations Council in the Competency-Based Curriculum. (3 marks)

1. **Assessment Development:** Designs tools for assessing competencies rather than traditional exams.
2. **Quality Assurance:** Ensures assessments align with CBC goals.
3. **Certification:** Validates learners' achievements by issuing certificates recognizing acquired competencies.

For instance, KNEC might develop performance-based assessments to measure learners' skills in problem-solving.

2. Examine the contribution of the philosophical foundations to the Competency-Based Curriculum in Kenya. (15 marks)

Philosophical foundations provide a guiding framework that shapes the goals, structure, and delivery of the Competency-Based Curriculum (CBC) in Kenya. These foundations include:

1. **Pragmatism:**
 - CBC emphasizes practical, real-life applications of knowledge. Pragmatism supports the learner-centered approach, where students learn through active participation and problem-solving tasks.
 - For instance, learners engage in projects that require critical thinking and collaboration, such as creating sustainable farming models.
2. **Progressivism:**
 - This philosophy underpins the emphasis on skills development, creativity, and continuous learning.
 - CBC focuses on equipping learners with competencies like innovation, digital literacy, and communication, which are essential for modern society.
3. **Essentialism:**
 - While CBC focuses on competencies, it still retains essential knowledge and skills, ensuring students achieve literacy, numeracy, and basic scientific understanding.
4. **Social Reconstructionism:**
 - CBC seeks to address societal challenges like inequality by promoting values such as respect, equity, and environmental sustainability.
5. **Humanism:**

- This philosophy supports the holistic development of learners, focusing on their emotional, social, and psychological growth alongside academics.
- Examples include the integration of guidance and counseling in schools to support learners' well-being.

The integration of these philosophies ensures CBC develops well-rounded individuals prepared for personal, societal, and global challenges.

3(a). Examine the function of KICD as an agent of curriculum development. (5 marks)

The Kenya Institute of Curriculum Development (KICD) plays a critical role in curriculum development, including:

1. **Policy Formulation:** KICD sets guidelines and policies to ensure the curriculum aligns with national goals.
 2. **Content Development:** It designs and revises curriculum content to meet current educational needs.
 3. **Training Educators:** KICD provides training for teachers to implement the curriculum effectively.
 4. **Research and Innovation:** Conducts studies to identify gaps and introduce innovative practices in curriculum delivery.
 5. **Assessment Development:** Collaborates with institutions like KNEC to align assessments with curriculum objectives.
-

3(b). Assess the process used by KICD to develop Competency-Based Curriculum. (10 marks)

The development of CBC by KICD involves several stages:

1. **Needs Assessment:**
 - KICD conducts research to identify gaps in the existing curriculum, focusing on the skills required for the 21st century.
2. **Stakeholder Engagement:**
 - Involves consultations with teachers, parents, policymakers, and industry experts to gather diverse perspectives.
3. **Policy Framework Design:**
 - Aligning the curriculum with national goals such as Vision 2030 and global trends like the Sustainable Development Goals (SDGs).
4. **Curriculum Design and Development:**
 - Content is created based on competencies such as critical thinking, communication, and digital literacy.
5. **Piloting and Feedback:**
 - CBC is tested in selected schools to identify challenges and areas for improvement.
6. **Teacher Training:**

- KICD trains educators on CBC delivery methods, emphasizing learner-centered approaches.
 - 7. **Implementation and Monitoring:**
 - CBC is rolled out nationally, with ongoing evaluation to ensure objectives are met.
-

4(a). Assess the role of quality assurance and standards officers in curriculum implementation. (5 marks)

Quality assurance and standards officers play an essential role in CBC implementation, including:

1. **Monitoring and Supervision:** Ensuring teachers adhere to CBC guidelines and maintain teaching standards.
 2. **Capacity Building:** Training teachers on curriculum delivery and providing professional development.
 3. **Evaluation:** Assessing the effectiveness of teaching methods and learning outcomes.
 4. **Resource Allocation:** Verifying the availability of adequate resources such as textbooks and teaching aids.
 5. **Reporting:** Providing feedback to education authorities for policy adjustments.
-

4(b). Discuss instructional evaluation in Competency-Based Curriculum. (10 marks)

Instructional evaluation in CBC focuses on assessing learners' progress in acquiring competencies. It involves:

1. **Formative Assessment:** Continuous assessment during lessons to provide feedback and guide learning.
 - Example: Observing group discussions to evaluate collaboration skills.
 2. **Summative Assessment:** Evaluates overall achievement at the end of a learning period.
 - Example: A project-based task requiring learners to apply problem-solving skills.
 3. **Authentic Assessment:** Real-life tasks to evaluate practical application of knowledge.
 - Example: Designing a community cleanup campaign to assess environmental awareness.
 4. **Performance-Based Assessment:** Focuses on learners' ability to demonstrate skills.
 - Example: A science experiment to test analytical skills.
 5. **Self and Peer Assessment:** Encourages reflection and feedback among learners, promoting critical thinking and responsibility.
-

5(a). Describe the Tyler model of curriculum development. (5 marks)

The Tyler model is a linear framework for curriculum development based on four principles:

1. **Defining Objectives:** Identifying what learners are expected to achieve.
2. **Selecting Learning Experiences:** Choosing activities that align with the objectives.
3. **Organizing Learning Experiences:** Structuring content to ensure logical progression.
4. **Evaluating Outcomes:** Assessing if objectives have been met through appropriate tests or assignments.

For example, in teaching science, objectives might include developing analytical skills, with activities like experiments and evaluation through lab reports.

5(b). Compare and contrast 8-4-4 and the Competency-Based Curriculum. (10 marks)

Aspect	8-4-4	CBC
Structure	8 years primary, 4 years secondary, 4 years tertiary.	2-6-6-3 system: pre-primary, primary, junior secondary, tertiary.
Focus	Knowledge-based.	Competency and skills-based.
Assessment	Heavy reliance on summative exams.	Emphasis on formative and authentic assessment.
Teaching Approach	Teacher-centered.	Learner-centered.
Curriculum Goals	Academic excellence.	Holistic development (skills, values, attitudes).
Inclusion of Values	Minimal integration of life skills.	Strong emphasis on values and citizenship.

1(a). Give two differences between the 8-4-4 curriculum and the Competency-Based Curriculum in Kenya. (2 marks)

1. **Focus of the Curriculum:**
 - The 8-4-4 curriculum is knowledge-based, emphasizing academic achievement and content mastery.
 - The Competency-Based Curriculum (CBC) is skills-based, focusing on the development of practical skills, values, and competencies.
2. **Assessment:**
 - The 8-4-4 curriculum relies heavily on summative exams to evaluate student performance.
 - The CBC uses formative assessments to monitor learners' progress continuously and authentic assessments to test real-life application of skills.

1(b). State two reasons why learning outcomes are important to a teacher. (2 marks)

- 1. Guiding Instruction:**
 - Learning outcomes help teachers plan lessons effectively by focusing on what students should achieve by the end of the lesson.
 - 2. Assessment of Progress:**
 - They provide a benchmark for evaluating whether learners have achieved the intended skills, knowledge, or attitudes.
-

1(c). Describe two ways through which philosophical foundations influence the selection of curriculum content. (2 marks)

- 1. Alignment with National Goals:**
 - Philosophies like pragmatism ensure curriculum content emphasizes problem-solving and practical skills, aligning with societal needs.
 - 2. Focus on Holistic Development:**
 - Humanistic philosophies guide the inclusion of content that supports learners' emotional, social, and intellectual growth.
-

1(d). State two characteristics of the formal dimension of the school curriculum. (2 marks)

- 1. Planned and Structured:**
 - The formal curriculum includes content outlined in syllabi, textbooks, and timetables.
 - 2. Assessment-Oriented:**
 - It is often linked to assessments and evaluations to measure learner performance.
-

1(e). Explain three qualities of a professional teacher. (3 marks)

- 1. Subject Mastery:**
 - A professional teacher has in-depth knowledge of their subject area to deliver content effectively.
 - 2. Effective Communication:**
 - Teachers must communicate clearly and adapt their language to suit learners' comprehension levels.
 - 3. Ethical Conduct:**
 - A professional teacher demonstrates integrity, respect, and fairness in dealing with students, parents, and colleagues.
-

1(f). State two differences between Tyler (1949) and Taba (1962) models of curriculum development. (2 marks)

1. Approach:

- Tyler's model is linear, focusing on objectives as the foundation of curriculum development.
- Taba's model is inductive, starting with the teacher's input to design the curriculum.

2. Flexibility:

- Tyler's model is rigid, emphasizing predetermined objectives.
 - Taba's model is more flexible, allowing for adjustments based on classroom experiences.
-

1(g). Explain two advantages of learner-centered curriculum designs. (4 marks)

1. Promotes Active Learning:

- Learner-centered designs encourage students to take responsibility for their learning through activities like problem-solving and group discussions.

2. Catering to Individual Needs:

- This approach considers learners' interests, abilities, and experiences, making education more personalized and engaging.
-

1(h). Describe three roles of the Kenya National Examinations Council in curriculum development. (3 marks)

1. Assessment Design:

- KNEC develops assessments aligned with curriculum objectives to evaluate learners' progress effectively.

2. Feedback Provision:

- It provides insights into curriculum effectiveness based on exam performance, guiding necessary revisions.

3. Quality Assurance:

- KNEC ensures that assessment standards align with global best practices and national goals.
-

1(i). Explain three roles of the Teachers Service Commission in curriculum implementation. (3 marks)

1. Teacher Recruitment and Deployment:

- TSC ensures adequate staffing in schools to facilitate effective curriculum implementation.

2. Capacity Building:

- It organizes training programs for teachers to equip them with skills for delivering new curricula, such as CBC.

3. Performance Monitoring:

- TSC evaluates teacher performance to ensure adherence to curriculum delivery standards.

1(j). Differentiate the terms formative and summative assessment. (2 marks)

1. Formative Assessment:

- Ongoing evaluation during the learning process to provide feedback and improve instruction.
- Example: Quizzes or classroom observations.

2. Summative Assessment:

- Conducted at the end of a learning period to evaluate overall achievement.
- Example: End-term exams.

1(k). Give reasons for the use of assessment for learning by teachers. (2 marks)

1. To Identify Learning Gaps:

- Assessment for learning helps teachers pinpoint areas where students need additional support.

2. To Guide Instructional Strategies:

- It informs teachers about the effectiveness of their teaching methods, enabling adjustments for better outcomes.

1(l). Describe three ways of judging the quality of an innovation. (3 marks)

1. Relevance:

- Assess whether the innovation addresses current needs or solves existing problems.

2. Effectiveness:

- Evaluate the innovation's ability to achieve its intended outcomes, such as improving learning outcomes.

3. Scalability:

- Determine whether the innovation can be adapted or replicated across different settings without losing effectiveness.

(a) Differentiate the terms objective and learning outcome. (2 marks)

1. Objective:

- An objective is a specific statement of what a teacher intends to achieve during a lesson. It focuses on instructional goals and what the teacher will deliver.

2. Learning Outcome:

- A learning outcome is a measurable statement of what a student is expected to demonstrate after completing a lesson or activity. It focuses on what the learner will achieve.

(b) Describe three characteristics of the non-formal dimension of the school curriculum. (3 marks)

1. **Flexibility:**
 - Non-formal education programs are adaptable to the needs of learners and the community.
2. **Skill-Based:**
 - They often emphasize practical and vocational skills rather than academic content.
3. **Optional Nature:**
 - Participation is voluntary and not bound by strict schedules or age requirements.

(c) Explain two ways in which the secondary school curriculum in Kenya helps in the preservation of cultural heritage. (2 marks)

1. **Inclusion of Indigenous Knowledge:**
 - Subjects like history and geography emphasize the traditions, values, and practices of different Kenyan communities.
2. **Promotion of Cultural Activities:**
 - Schools organize cultural days and encourage participation in traditional music, dance, and crafts.

(d) Describe three roles of teachers according to progressivism. (3 marks)

1. **Facilitators of Learning:**
 - Teachers guide learners in exploring real-world problems and encourage critical thinking.
2. **Developers of Inquiry-Based Activities:**
 - Teachers design projects and activities that promote experiential learning and problem-solving.
3. **Promoters of Individual Growth:**
 - Teachers support the holistic development of learners by nurturing their unique talents and abilities.

(e) Describe two roles of parents in the competency-based curriculum with reference to teaching and learning. (2 marks)

1. Providing Learning Resources:

- Parents ensure children have access to necessary tools such as books, internet access, and materials for practical learning.

2. Supporting Homework and Projects:

- Parents guide and motivate learners in completing assignments and competency-based tasks.
-

(f) Identify four documents used by the teachers in the classroom. (2 marks)

- 1. Schemes of Work**
 - 2. Lesson Plans**
 - 3. Attendance Registers**
 - 4. Progress Records**
-

(g) Explain the rationale for piloting during the curriculum process. (2 marks)

1. Testing Feasibility:

- Piloting ensures that the curriculum can be implemented effectively in real classroom settings.

2. Identifying Gaps:

- It helps in detecting any shortcomings or inconsistencies in the curriculum content or structure.
-

(h) Describe three principles for curriculum evaluation. (3 marks)

1. Relevance:

- Ensures the curriculum meets the needs of learners and aligns with societal goals.

2. Efficiency:

- Examines whether the curriculum achieves its objectives without wasting resources.

3. Effectiveness:

- Measures the impact of the curriculum on learners' skills, knowledge, and attitudes.
-

(i) Identify two advantages of subject pattern design. (2 marks)

1. Depth of Knowledge:

- It allows students to gain a thorough understanding of specific subjects.

2. Specialization:

- Learners can focus on subjects aligned with their career aspirations.

(j) Outline three roles of teachers in the curriculum development process. (3 marks)

- 1. Content Developers:**
 - Teachers provide input on the relevance of content based on classroom experience.
 - 2. Pilot Testers:**
 - They implement trial versions of the curriculum and give feedback on its practicality.
 - 3. Advisors:**
 - Teachers contribute insights into learners' needs and suggest improvements to curriculum developers.
-

(k) Explain three roles of the Kenya Institute of Curriculum Development during the curriculum process. (3 marks)

- 1. Research and Development:**
 - KICD conducts research to inform the design of new curricula.
 - 2. Curriculum Design:**
 - It develops curriculum frameworks, syllabi, and learning materials.
 - 3. Capacity Building:**
 - KICD trains teachers and stakeholders on how to implement the curriculum effectively.
-

(l) State three challenges to curriculum innovation. (3 marks)

- 1. Resistance to Change:**
 - Stakeholders, including teachers and parents, may resist new approaches due to lack of understanding or fear of the unknown.
 - 2. Inadequate Resources:**
 - Limited funding, materials, and infrastructure hinder the successful implementation of innovative curricula.
 - 3. Lack of Teacher Training:**
 - Insufficient professional development leaves teachers ill-prepared to adopt new methodologies.
-

Discuss the contribution of sociological foundation in the competency-based curriculum. (20 marks)

Sociological foundations play a crucial role in shaping the competency-based curriculum (CBC) by ensuring that education addresses the social needs, values, and expectations of a community. Below are key contributions:

- 1. Promotion of Equity and Inclusion:**

- Sociological principles ensure that the CBC accommodates learners from diverse social, cultural, and economic backgrounds. For instance, learners with disabilities are integrated through tailored interventions, fostering inclusivity.
- 2. **Link to Social Realities:**
 - CBC emphasizes real-life skills and competencies, such as teamwork, communication, and problem-solving, which are directly applicable to societal needs. This alignment bridges the gap between education and societal expectations.
- 3. **Cultural Preservation:**
 - CBC incorporates indigenous knowledge and cultural practices, ensuring learners appreciate and preserve their cultural heritage. For example, subjects like creative arts and social studies celebrate traditional music, dances, and community practices.
- 4. **Development of Social Skills:**
 - CBC promotes collaboration and interpersonal skills through group work and community-based projects. These activities prepare learners to function effectively in social settings.
- 5. **Addressing Social Challenges:**
 - The curriculum integrates topics like environmental conservation, peace education, and anti-corruption campaigns, equipping learners to address societal challenges effectively.
- 6. **Parental and Community Involvement:**
 - CBC encourages active participation of parents and the community in the learning process. For example, parents contribute to project-based learning and mentor learners in practical skills.
- 7. **Fostering Social Responsibility:**
 - Through service learning and community engagement projects, learners develop a sense of responsibility towards societal well-being.
- 8. **Focus on Lifelong Learning:**
 - By emphasizing continuous learning and adaptability, CBC prepares students to navigate dynamic societal changes, such as technological advancements and globalization.

(a) Explain the rationale for competency-based curriculum in Kenya. (5 marks)

The rationale for implementing the competency-based curriculum (CBC) in Kenya includes:

1. **Focus on Practical Skills:**
 - CBC aims to equip learners with skills like critical thinking, creativity, and problem-solving, enabling them to address real-world challenges effectively.
2. **Learner-Centered Approach:**
 - It prioritizes the needs, interests, and abilities of individual learners, fostering personalized education.
3. **Adaptation to Societal Needs:**
 - CBC addresses contemporary issues like unemployment by equipping learners with entrepreneurial skills and technical know-how.
4. **Integration of Technology:**

- The curriculum incorporates digital literacy, preparing learners to thrive in a technology-driven world.
 - 5. **Global Competitiveness:**
 - CBC aligns with international education standards, ensuring Kenyan learners are globally competitive.
-

(b) Examine the role of the Research, Development, and Diffusion model of curriculum development. (15 marks)

The Research, Development, and Diffusion (RDD) model is systematic and research-based, focusing on designing, testing, and implementing a curriculum. Its roles include:

1. **Needs Assessment:**
 - RDD identifies gaps in the current curriculum by conducting extensive research on learners' needs, societal demands, and industry expectations.
 2. **Curriculum Design:**
 - It develops a prototype based on research findings, ensuring the curriculum is relevant and evidence-based.
 3. **Pilot Testing:**
 - The curriculum is tested in selected schools to identify challenges and refine the content, structure, and delivery methods.
 4. **Feedback Mechanism:**
 - Feedback from pilot tests helps in improving the curriculum to ensure it meets its objectives effectively.
 5. **Capacity Building:**
 - Teachers and stakeholders are trained during the diffusion phase to ensure smooth implementation of the curriculum.
 6. **Wide-Scale Implementation:**
 - After successful piloting, the curriculum is rolled out nationally, accompanied by continuous monitoring and evaluation.
 7. **Scalability and Adaptability:**
 - The model allows for adjustments to cater to diverse learners and changing societal needs.
-

(a) Discuss the KICD approach to competency-based curriculum. (10 marks)

The Kenya Institute of Curriculum Development (KICD) plays a central role in the development and implementation of the CBC. Its approach includes:

1. **Research and Needs Analysis:**
 - KICD conducts thorough research to determine the relevance and feasibility of the CBC, considering global trends and local demands.
2. **Curriculum Design and Development:**
 - It collaborates with subject matter experts to create frameworks, syllabi, and instructional materials aligned with CBC principles.
3. **Stakeholder Engagement:**

- Teachers, parents, and industry representatives are involved in the development process to ensure inclusivity.
 - 4. **Capacity Building:**
 - KICD trains teachers and educational officers to effectively deliver CBC content.
 - 5. **Monitoring and Evaluation:**
 - Regular assessments are conducted to ensure the curriculum achieves its objectives and meets learners' needs.
-

(b) Assuming that you are the Cabinet Secretary of Education, discuss the strategies you would use to ensure successful implementation of a curriculum innovation in Kenya. (10 marks)

1. **Stakeholder Sensitization:**
 - Engage teachers, parents, and the community through workshops and media campaigns to ensure they understand the new curriculum.
 2. **Teacher Training:**
 - Provide professional development programs to equip teachers with the skills and knowledge needed for the innovation.
 3. **Adequate Resources:**
 - Allocate funding for learning materials, infrastructure, and digital tools to support implementation.
 4. **Continuous Monitoring:**
 - Establish systems for tracking progress and addressing challenges during implementation.
 5. **Feedback Mechanism:**
 - Encourage regular feedback from educators, students, and parents to refine the curriculum.
-

Compare and contrast 8-4-4 and competency-based curriculum. (20 marks)

1. **Focus:**
 - The 8-4-4 system emphasizes academic achievement, while CBC focuses on skill development and competencies.
2. **Structure:**
 - The 8-4-4 system divides education into eight years of primary, four years of secondary, and four years of tertiary education. CBC is organized into pre-primary, primary, and junior and senior secondary phases.
3. **Assessment:**
 - 8-4-4 relies heavily on summative exams. CBC uses formative assessments and project-based evaluations.
4. **Content Delivery:**
 - 8-4-4 is teacher-centered, whereas CBC is learner-centered.
5. **Global Relevance:**
 - CBC aligns with 21st-century skills like digital literacy, unlike 8-4-4, which has a traditional approach.

KENYATTA UNIVERSITY
SCHOOL OF EDUCATION

I wish You
Success
in your Exams

And as you prepare for this important moment, remember:

- *You are capable of achieving great things.*
- *Hard work and dedication always pay off.*
- *Believe in yourself, and trust your preparation.*

May your efforts bear fruit and your results reflect your true potential

Good luck.

OTONDE MICHAEL AWITI
